The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Engie SA business.

## **About Engie SA**

The company was formerly known as GDF SUEZ SA and changed its name to ENGIE SA in April 2015.

Engie SA provides energy solutions to individuals, cities and businesses. The company is active across the entire energy value chain, in electricity and natural gas, upstream to downstream.

### **Segments**

The company operates in eight segments: Energy France; Energy Benelux & Germany; Energy Europe; Energy International; Global Gas & LNG; Infrastructures; Energy Services; and SUEZ Environnement.

#### **Energy France**

The company's subsidiaries operating in this business segment produce electricity and sell natural gas, electricity and services to private individuals, small business customers and companies in France.

#### **Energy Benelux & Germany**

The company's subsidiaries in this segment produce electricity and/or provide electricity transmission and distribution services to Benelux and Germany.

### Energy Europe

The company's subsidiaries produce electricity and/or provide electricity transmission and distribution services in Europe (excluding France, Benelux and Germany).

### Energy International

The company's subsidiaries produce electricity and/or provide electricity transmission and distribution services outside Europe.

### Global Gas & LNG

The company's subsidiaries supply gas to it and sell energy and service packages to key European players.

### Infrastructures

The company's subsidiaries in this segment operate gas and electricity transportation, storage and distribution networks in France and Germany. They also sell access rights to this infrastructure to third parties.

### Energy Services

The company's subsidiaries provide engineering, installation, maintenance and delegated management services, particularly in relation to electrical and heating facilities, pipeline systems and energy networks.

### SUEZ Environnement

The company's subsidiaries operating in this business segment provide private customers, local authorities and industrial customers with: water distribution and treatment services, notably under concession contracts (water management), and water purification facility design and construction services (turnkey engineering); and waste collection and treatment services, including sorting, recycling, composting, landfilling, energy recovery and hazardous waste treatment.

## Acquisitions

In September 2008, the company acquired the entire share capital of Senoko Power, which owns and operates a portfolio of power plants (primarily gas-fired combined cycle facilities) located mainly in the north of Singapore. The facilities have a combined capacity of 3,300 MW.

In December 2008, the company completed its acquisition of FirstLight Power Enterprises Inc., which owns and operates a portfolio of 15 electrical power plants and is building a natural gas unit. These facilities represent a total capacity of 1,538 MW in Massachusetts and Connecticut.

In October 2008, the company acquired a group of exploration & production assets situated in the Dutch section of the North Sea from Nederlandse Aardolie Maatschappij BV (NAM), as well as a 30% interest in the NOGAT pipeline in December 2008.

## Significant Events

On August 18, 2009, Santos Ltd. and GDF Suez have announced a partnership to develop a floating LNG project in the Bonaparte Basin. GDF SUEZ and Santos would form a 60/40 unincorporated joint venture, to be led by GDF SUEZ, to develop and operate a proposed floating liquefaction plant with a planned capacity of 2mtpa of LNG that would utilise the gas from the Petrel, Tern and Frigate natural gas fields.

The company has signed an agreement with Chinese Chongqing Energy Investment Group to set up a 40/60 joint venture to build and operate the heating and cooling systems of Chongqing municipality, western China.

On February 16, 2010, Pacific BioEnergy Corporation has collaborated with GDF SUEZ. The collaboration is targeted at supporting expansion of Pacific BioEnergy's present wood pellet production facilities in Prince George, BC. Pacific BioEnergy and GDF SUEZ have collaborated to form a new joint venture to own and operate the PG Plant.

On September 21, 2010, GDF Suez and Solar Power Group GmbH have agreed to jointly develop a 5MW thermal concentrated solar power plant which would supply superheated steam to the Mejillones coal-fired plant in the North of Chile.

In November 2010, GDF Suez, Iberdrola SA, and Scottish & Southern Energy plc had

established their joint venture company; NuGeneration Ltd. NuGen would develop a new generation nuclear power station of approximately 3.6 GW on land in West Cumbria and north-west England.

## History

GDF Suez was founded in 1880.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
