The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Genoil Inc. business.

About Genoil Inc.

Genoil Inc. engages in the development of hydrocarbon, oil and water separation, and marine technologies for the oil and gas, and commercial marine industries.

Genoil Hydroconversion Upgrader

The company develops and markets applications of its proprietary heavy oil upgrading technology – the Genoil Hydroconversion Upgrader (GHU). The GHU converts sour (high sulphur) and heavy hydrocarbon feed stocks into lighter oil with distillates for conventional refining. The company has both a U.S. and a Canadian patent for its GHU process.

Oil and Water Separators

The Crystal Separator is suitable for a range of applications, including off-shore oil platforms, wastewater treatment plants, refineries, gasoline service stations and ports. Its Crystal Sea oil and water separator is a unit that is able to handle small volumes from 2 GPM to 20 GPM using a compartmental process. The company is in the process of developing scaled up units that can handle larger volumes.

The company is partnering with a Canadian testing advisor to the cruise ship and ferry

industries to set up testing agreements with various ship owners. Genoil has also partnered with international agents and a manufacturer to roll out the Crystal technology for ports in Asia, Middle East and other areas. The company has both a U.S. and a Canadian patent for the Crystal technology, as well as a PCT application.

Agreements

The company and Aquamation, Inc. has a joint operating agreement to jointly collaborate in industrial water treatment projects and process plants for the oil and gas, and petrochemical industries. Both companies started work on two gas metering projects in Nigeria.

In 2009, the company announced it signed a five year licensing agreement with DongHwa Entec Co., Ltd. located in Busan, South Korea, a manufacturer of heat exchangers and related multi-stage water generators for various industries, including marine.

In 2009, the company signed a joint venture agreement with the Clarendon Group to cooperate internationally in the promotion, marketing, sales, service provision and logistics of Genoil's Crystal Oily Water Separators.

History

Genoil Inc. was founded in 1996.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
