The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Geodesic Limited business.

## **About Geodesic Limited**

Geodesic Information Systems Ltd. (Geodesic or the company) was incorporated in 1999 as a software solutions company. Geodesic has had a history marked with bright ideas, breakthrough thinking and path-breaking achievements. Geodesic, built to deliver high performance and cost effective IT solutions to customers and develop innovative products for the web has a strategy to focus its inventive capabilities across four key areas of the information technology space. They include:

### **Mundu Messenger**

Mundu Messenger is an Interoperable Instant Messaging tool that lets users communicate with one another instantly and seamlessly communicate across other major instant messaging services including AIM, ICQ, MSN and Yahoo. In addition to a robust client and server software architecture, Mundu aggregates and blends content from inside and outside the company; integrates disparate applications and intranet content & tools; personalizes information based on roles and permissions.

### **Bazar e-business**

Bazar e-business is a shopping engine that's multi-merchant, multi location, multi-

session and consumer centric; a basket of ready to use components to quickly set up a virtual marketplace; allows for customer experience across entire mall

Product/Merchant/Price/Delivery mode comparison; currently powers hamarashop.net across 100+ merchants, over 200,000 products and 150+ brands; and are components used to set up instrumentexplorer.com in a short span of time.

e-commerce B2C integrated engine

Business-to-consumer (B2C) electronic commerce enterprises are information-driven entities that have some of the most extreme information technology solution requirements found in the commercial business world.

Geodesic e-bazaar offers users a simple and comprehensive way to build customized, effective e-commerce solutions. E-bazaar provides the application framework, together with sophisticated feedback mechanisms and analytical capabilities. E-bazaar allows e-commerce entities to quickly develop sites that optimize customer experience, encourage repeat business and forge tighter partner relationships.

e-transact B2B integrated engine

Key industry analysts have consistently valued and re-valued the enormous market opportunity available over the next several years in the business-to-business (B2B) e-commerce arena. Geodesic's bazaar provides the most comprehensive B2B portal solution to Internet B2B market B2B Architects to entirely leverage this incredible potential. The Bazaar-B2B Portal Solution 1.0-automates the business process for fastest time-to-market.

The bazaar portal engine for the Internet B2B market B2B Architects represents a complete phase in the development of a collaborative, commerce-enabled community that will consolidate the marketing and promotional power of industries.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
