Abstracts

Global Defense Technology & Systems, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Global Defense Technology & Systems, Inc. and its competitors. This provides our Clients with a clear understanding of Global Defense Technology & Systems, Inc. position in the Industry.

The report contains detailed information about Global Defense Technology & Systems, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Global Defense Technology & Systems, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Global Defense Technology & Systems, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Global Defense Technology & Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Global Defense Technology & Systems, Inc. business.

About Global Defense Technology & Systems, Inc.

Global Defense Technology & Systems, Inc. provides technology-based systems, solutions, and services for national security agencies and programs of the U.S. government. The company's services and solutions are integral parts of programs run by the Department of Defense, Intelligence Community, Department of Homeland Security, federal law enforcement agencies, and other parts of the federal government charged with national security responsibilities. The programs that the company supports are generally funded as part of the budgets and spending levels of the U.S. government agencies entrusted with carrying out the U.S. government's defense, intelligence, and homeland security missions.

The company's primary areas include counter-terrorism intelligence and analysis; data analysis and intelligence fusion tools; force mobility, modernization, and survivability solutions; maritime domain awareness and navigation systems; systems and software engineering; network and communications management; and decision support systems for command and control.

Segments

The company conducts its business through two segments: Technology and Intelligence Services, or TIS, and Force Mobility and Modernization Systems, or FMMS.

TIS

TIS segment provides a range of technology-based services and solutions, including counter-terrorism and intelligence solutions and command, control and decision support solutions, to customers in the Department of Defense, the Intelligence Community, and other U.S. agencies. The company's TIS segment comprises the operations of TAC and its Global Mission Systems, or GMS, division.

FMMS

FMMS segment provides customers, primarily in the Department of Defense, with solutions that entail the design, engineering and integration of highly mobile mission support systems. The company's FMMS segment comprises the operations of its Global Defense Engineering, or GDE, division.

Capabilities and Customer Solutions

Software Engineering

The company designs, develops, documents, tests, integrates, and implements custom software modules and solutions focused on Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance, or 'C4ISR,' C4ISR and Intelligence Community applications. These services range from firmware development for weapons systems to Web-based portal development for network operations centers. The company also develops applications that provide sensor control and fusion, data integration and correlation, communications management, cross-domain solutions, knowledge management, automated navigation systems, and decision support systems.

Systems Engineering

The company provides services to design, develop, and implement custom mission systems for communications, decision support and sensor integration. In this capacity, the company provides systems, solutions, and services for dynamic network and

bandwidth management, joint law enforcement, and Department of Defense tactical data links, network topology design, integration of legacy systems and interfaces, integration of disparate sensors, geospatial systems, and data fusion for decision support.

Mission Systems IT & Architectures

The company designs, develops, and runs information technology systems and architectures.

Technology Development

The company investigates and develops new technologies that can be used to improve or create new systems and solutions for use by military and national security customers. The company performs customer-funded research and development efforts at government research laboratories in the fields of electronics, acoustics, electronic warfare, radar, optics, chemistry, plasma physics, materials, space sciences, and other disciplines. The company's personnel also integrate sensors, components, and devices on aircraft and into aircraft reconnaissance pods.

Engineering Design, Prototyping and Integration

The company designs, assembles, and deploys various solutions for the U.S. military services to support force mobility and modernization requirements and to move the U.S. military to an expeditionary footing.

Counter-Terrorism, Intelligence, and Command, Contr

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
