Abstracts

Global Materials & Services Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Global Materials & Services Inc. and its competitors. This provides our Clients with a clear understanding of Global Materials & Services Inc. position in the Industry.

The report contains detailed information about Global Materials & Services Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Global Materials & Services Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Global Materials & Services Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Global Materials & Services Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Global Materials & Services Inc. business.

About Global Materials & Services Inc.

Global Materials & Services Inc. engages in the development, manufacture and marketing of a line of interior and exterior fire retardant chemicals and provides fire resistive finishing services through its Textile Processing Center for commercial users. It also designs new technology for future fire resistive applications that are being mandated by local, state and governmental agencies and are active in the construction industry as subcontractors for firestop and firefilm installations and fireproofing applications.

Products and Services

Fire Retardant Chemicals and Coatings

Fyberix2000V is a non-durable fire retardant compound designed for textiles used in hospitals, nursing homes, hospices and other health care facilities as well as in the transportation and tourist industries. It enables fabric to be fire resistive while maintaining a clean appearance with its anti-soiling agent and at the same time resists the growth of bacteria, fungus, and mites.

Fireextra1000 is an available concentrate or ready-to-use form as a primary all-purpose,

non-durable aqueous saline, based fire retardant compound. It is used on almost every type of textile fabric - natural, synthetic, or blended. It is used on unfinished wood and wood products as well as hay and paper. It is used in treating leather and is used by the major leather tanners in the United States.

Fyberix2000 is an all-purpose, non-durable aqueous saline-based fire retardant and anti-soiling compound. It is designed for fabrics used as upholstery, drapery and curtain.

FireextraNS200 is an all-purpose non-durable and non-saline aqueous based fire retardant compound. It is used on almost every type of textile fabric, natural, synthetic, or blended. It is especially useful for treating fabrics where chemical salt content could present problems.

Fireextra4000 is an aqueous saline based fire retardant compound. It is designed to treat unfinished wood and wood products, thatch and bamboo. Wood products treated with this product kept indoors or away from weathering unless the surface has been sealed with a paint or sealant after application.

Fireextra4135 is a non-durable aqueous saline based fire retardant compound. It is designed to treat spun woven polyester fabrics.

Fireextra5000 is a non-durable aqueous saline based fire retardant compound. It is designed specifically for nylon fabrics.

FireextraUV-11 is a concentrate that can be diluted with plain water or added to other fire retardant or soil protection compounds against Ultra Violet B waves that cause color fading, fabric thread weakening and fabric aging.

FireextraFBC is latex in aqueous base. The product is used on the backside of hard-to-treat textile products. In addition to providing fire resistance, the product adds fabric strength and integrity to the fabric. Noveon (formerly B.F. Goodrich), is the major chemical supplier of FireextraFBC.

Fireextra238 is an acrylic base clear coating fire retardant compound. It is used on thatch, bamboo and other wood products that must be used outdoors and/or be exposed to the elements of weather.

Textile Processing Center for Fire Resistive Fabrics

The company provides fire retardant chemicals to fabrics for commercial customers. Its main clients are purchasing agents who are hired by major hotel chains to assist the hotels as buyers during new construction or refurbishing. Its products are applied by interior designers, hotels and purchasing agents, restaurants, hospitals, schools, business, etc.

Firestop and Firefilm Installation and Fireproofing Application

The company offers two main retail products: 3-in1 Hero and TreeSafe.

3-in1 Hero: 3-in-1 Hero is a product for upholstery, draperies, carpets and similar fabrics to make them fire retardant, inhibit microorganisms such as dust mites and it also prevents the treated fabric from being faded by UV rays from the Sun.

TreeSafe: TreeSafe product prevents flames from occurring or spreading on Christmas trees.

The company, through its subsidiary, National Certified Fire Retardants, Inc. or NCFR, Inc., provides fire retardant paints, varnish, saturates, and intumescent coatings. The product line includes NCFR 1000, NCFR 102, NCFR 1001 XC, NCFR 142, NCFR 154, NCFR 125 and NCFR Flameout products.

Suppliers

The company's suppliers include Van Waters and Rogers, Morre-tech, Rhodia, Noveon, and Atlas Chemical.

Competition

The company's major competitors in the fabric finishing market are Kiesling and Hess, Texas Flameproofing and Schneider Banks.

History

Global Materials & Services, Inc. was formed in 1992 as American Fire Retardant Corporation and changed its name to Global Materials & Services, Inc. in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
