The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Global Security Agency Inc business.

About Global Security Agency Inc

Global Security Agency Inc. operates in the security services and risk management industry in the United States and internationally. The company offers a range of security and risk management services for individuals, corporations and other entities. Its services include risk assessments, training, crisis management, protection, support, and intelligence.

Services

Risk Assessments

The company provides security assessments and planning services to clients to find the strengths and weaknesses of security processes before a crisis occurs, including with respect to building projects, industrial and chemical plants, corporate facilities and private residences. It provides a review of a facility's premises, operating systems and procedures, and identifies vulnerabilities.

The company's security assessments may include an evaluation of security staff, badgeing, procedures, communications capabilities, emergency action plans, command

centers, and event security training. It provides clients with reports documenting the efficiency of security measures and recommend solutions for mitigating and eliminating risks. It also provides recommendations for establishing a security plan and work with clients to implement the plan if needed.

Building Projects

The company assists with developing for its clients, among other things, incident response objectives; threat reporting procedures; evacuation policies and procedures; threat management team roles and responsibilities; facility emergency call lists; safety/security manuals outlining building profiles, floor plans, and safety procedures; and training procedures for personal safety awareness, including recurrent training for threat management leaders.

Security Training Programs

The company assists in developing training programs for its clients to address security threats to them. It trains clients to implement preventive security measures, recognize security threats, react if confronted with danger and act once a crisis has occurred. The company's pre-incident training services include country briefings, table-top exercises, customized simulations and evasive driver training and firearms training.

The company also trains executives and other individuals on how to avoid dangerous situations during the course of their day, and during travel, by implementing safeguards that reduce overall risk. It assists with minimizing their chances of being victimized by enhancing their security awareness. Its consultants can also deliver similar training to family and staff members.

Crisis Management

The company offers crisis management consulting services, including incident response, security consulting and training services to its clients. Its consultants specialize in the prevention and resolution of kidnaps-for-ransom, extortions, malicious product tampering, wrongful detention and client risk.

Kidnapping

The company's consultants act as intermediaries with outside contacts and provide clients with guidance, regular reports, and post-incident briefings and analyses.

Extortion

The company provides extortion-readiness planning and crisis-resolution services. It evaluates circumstances, identify possible options and recommend a solution that is suitable for the client and the situation.

Malicious Product Tampering

The company's consultants help companies ensure consumer protection by teaching them how to respond to an incident with the least amount of commercial damage to the organization. It helps clients prepare for the unexpected, reduce potential harm to personnel, minimize litigation and protect the reputations of their organizations. It also assists with investigations through incident containment, information collection, asset tracing, and product safeguard recommendations.

Wrongful Detention

The company works with outside parties in an advisory capacity to help free victims with the least amount of harm or incident possible. This process often involves dealing with law enforcement or government officials.

Hijacking

The company assists clients to assess their security operations at port or at sea to identify potential physical or op

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
