The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of GlobalSCAPE, Inc. business.

About GlobalSCAPE, Inc.

GlobalSCAPE, Inc. develops and distributes software and hosted solutions, and provides associated services, for individuals and business users to exchange information over the Internet and with in other network environments. The company's software is used worldwide across a range of industries, including the U.S. and foreign government organizations.

As of December 31, 2009, the company had distributed approximately 2 million software licenses to its customer base which includes individual consumers, small to medium-sized businesses.

The company's solution portfolio facilitates delivery of critical information, such as financial data, medical records, customer files and other similar documents while supporting a range of information protection approaches to meet privacy and other security requirements. The company's products also provide data replication, acceleration of file transfer, sharing/collaboration and continuous data backup and recovery to its customers.

Products

FTP Client Programs

File transfer protocol, or FTP, is the language used for file transfers from computer to computer across the Internet. FTP is used to download a file from a server or to upload a file to a server.

CuteFTP: CuteFTP is a 'client-side' program, meaning that it permits a user to request a file from or send a file to an FTP server or host computer. The user base for this program ranges from corporate IT professionals who use it to transfer data between locations via the Internet, to individual Web site operators who use it to upload their Web pages to their Web hosting provider. CuteFTP simplifies use of file transfer protocol by hiding the technical processes behind a graphical user interface, which allows users to 'drag and drop' files between computers. The company offers CuteFTP in German, French, Spanish, Japanese, Traditional and Simplified Chinese, Russian, Portuguese and Turkish.

CuteFTP Pro: CuteFTP Pro is a FTP client program designed for advanced users and information technology professionals. CuteFTP Pro incorporates standards for encrypting data during transport and at rest, accelerating transfer of large files, and automating common file transfer tasks.

File Transfer Servers

FTP, along with more secure protocols such as SFTP, SSL, and HTTP/S, requires two software programs: a client program to start a transfer and a server program to accept the connection. The company's server software programs are designed to provide businesses with security, automation, and performance. The company's legacy Secure FTP Server and EFT Server solutions are available as EFT Server and EFT Server Enterprise, respectively.

Enhanced File Transfer Server: EFT Server complements CuteFTP Pro and other third party FTP clients by enabling encrypted transfers using SSL, SSH2 and advanced S/KEY password encryption. When used with CuteFTP Pro, EFT Server offers a digital certificate management system, giving system administrators the ability to manage digital certificates, as well as initiate back-end processes with other customer systems.

With the release of EFT Server Version 6, EFT Server supports add-on modules and software such as the Auditing and Reporting Module (ARM), High-Security Payment Card Industry (HS-PCI) Module, OpenPGP Module, Web Transfer Client, Secure Ad

hoc Transfer (SAT) Module, DMZ Gateway, encrypting file system, and FIPS 140-2 cryptographic libraries.

Enhanced File Transfer Server Enterprise: EFT Server Enterprise is an enterprise file server, building on the base features of EFT Server. EFT Server Enterprise supports large-enterprise installations and is compatible with the new Advanced Workflow Engine (AWE) Module released by GlobalSCAPE in 2009. The AWE Module provides approximately 200 built-in 'drag and drop' workflow actions, including sending SNMP traps, communicating with mainframe computers, redirecting or relocating files, integrating SQL and XML capabilities, and executing third-party applications, custom programs, and batch files.

Data Replication Products

The company's data replication products allow users to maintain and synchronize their live data files in multiple remote

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
