term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gold Fields Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gold Fields Ltd. business.

### **About Gold Fields Ltd.**

Gold Fields Limited engages in the exploration, extraction, processing, and smelting of gold in South Africa, Ghana, Australia, and Peru.

**Driefontein Gold Mine:** Driefontein is situated approximately 70 kilo meters west of Johannesburg. It consists of eight producing shaft systems that mine different contributions from pillars and open ground, and three gold plants.

**Kloof Gold Mine:** Kloof is situated approximately 60 kilo meters west of Johannesburg. Kloof consists of six shaft systems and two gold plants.

**Beatrix Gold Mine:** It consists of four operating shafts and two gold plants.

**South Deep Project:** South Deep is situated in the districts of Westonaria and Vanderbijlpark (Gauteng Province). South Deep operates one gold plant and is accessed from surface through two shaft systems, the new Twin shaft complex of which the main shaft comprises a single-drop to a depth of 2,995 metres, and the original mine's South shaft complex.

**Tarkwa Gold Mine:** The Tarkwa gold mine is located in southwestern Ghana.

**Damang Gold Mine:** Damang is located in southwestern Ghana.

**St Ives Gold Mine:** The St Ives operations extend from 5 to 25 km south-southwest of the town of Kambalda in Western Australia. Ore is mined from three underground mines, three open pits and 10 surface stockpile sources, and processed via both mill/CIP and heap leach plants.

**Agnew Gold Mine:** Agnew is located 23 kilo meters west of the town of Leinster in Western Australia. Ore is mined from the Kim and Main ore bodies which form part of the Waroonga underground mining complex.

**Cerro Corona Mine:** The Cerro Corona Mine is situated in the highest part of the Western Cordillera of the Andes in northern Peru. The project involves the production of gold and copper by conventional open pit mining methods, and the copper-gold flotation concentrate is trucked to the Port of Salaverry for shipment to smelters in Japan, Korea and Europe.

### Significant Events

On September 20, 2010, Gold Fields Ltd. announced that it has entered into option agreements with Lepanto Consolidated Mining Company, and Liberty Express, to acquire a 60% interest in the undeveloped gold-copper Far Southeast (FSE) deposit in the Philippines.

In September 2010, the company has entered into option agreements with two firms to buy a 60% interest in an undeveloped gold-copper project in the Philippines.

### History

Gold Fields Limited was founded in 1968.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
