## Abstracts

Golden Gate Petroleum Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Golden Gate Petroleum Ltd. and its competitors. This provides our Clients with a clear understanding of Golden Gate Petroleum Ltd. position in the [Energy](#) Industry.

The report contains detailed information about Golden Gate Petroleum Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Golden Gate Petroleum Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Golden Gate Petroleum Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Golden Gate Petroleum Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Golden Gate Petroleum Ltd. business.

### **About Golden Gate Petroleum Ltd.**

Golden Gate Petroleum, Ltd. (Golden Gate or the company) was formed in 2003 after the merger of Australian company Valdera Resources Limited with Canadian company, Golden Gate Resources Limited. As a result the of the merger the Company has become a participant in the burgeoning North American gas industry through its interests in the Padre Island Project. The Company is a focussed petroleum exploration and production company with an exploration portfolio in the Gulf of Mexico containing world-class prospects.

#### **Padre Island Project (Project)**

The principal asset of the Company is a 10% participating interest in the Project held via its wholly owned subsidiary, Long Flat Limited. The other main participants in the Project are, BNP Petroleum Corporation, a private Texas corporation and its subsidiary BNP Oil & Gas Limited, Novtex Oil & Gas Limited, a subsidiary of ASX listed Novus Petroleum Limited and MOEX Texas Oil & Gas LP, a subsidiary of the giant Mitsui Corporation.

Padre Island, located in Texas on the Gulf of Mexico coastline, is a proven hydrocarbon producing area. The Project has acquired 143 drilling leases to date, covering an

estimated area of 28,000 hectares along Padre Island, through 3 phases of acquisition activity, with an option to acquire a further 12,000 hectares. These drilling leases are located within a project area that is 130 km long by 10 km wide. The Project has acquired and is interpreting 124,000 hectares of 3D seismic data within the project area.

To date, 4 wells have been drilled with 2 successfully commercialised in a short time frame. A further 32 prospects are ready for drilling with 18 more targets identified for further work. From the 2 wells commercialised, LaPlaya and West Bird, gross production to the joint ventures is now approximately 4 million cubic feet per day.

The current combined Project production rate from the two producing wells is between 4,000 – 4,100 cubic feet (mcf) per day.

#### BP Farm-In Of Ultra Deep Prospects

The Project announced a farm-out of these ultra deep prospects to oil giant, BP North America. Under this farm-out, BP is undertaking a full technical feasibility study of the ultra deep prospects to be completed by the end of 2003. Thereupon, BP can elect to drill ultra deep targets at its cost. The Project participants (other than KCS) retain a 25% reversionary interest in the ultra deep prospects drilled by BP carried into production. This means the Company will have an effective free carried 2.25% interest in any ultra deep drilling undertaken by BP up until BP has recovered its costs of drilling and bringing the ultra deep well into production.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
