Abstracts

Goodrich Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Goodrich Corp. and its competitors. This provides our Clients with a clear understanding of Goodrich Corp. position in the [Aerospace and Defense](#) Industry.

The report contains detailed information about Goodrich Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Goodrich Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Goodrich Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Goodrich Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Goodrich Corp. business.

About Goodrich Corp.

Goodrich Corporation supplies aerospace components, systems, and services to the commercial and general aviation airplane markets, as well as defense and space markets. The company sells products and services principally to customers in North America, Europe, and Asia.

Segments

The company's segments include Actuation and Landing Systems, Nacelles and Interior Systems, and Electronic Systems.

The Actuation and Landing Systems segment provides systems, components and related services pertaining to aircraft taxi, take-off, flight control, landing and stopping, and engine components, including fuel delivery systems and rotating assemblies.

The Nacelles and Interior Systems segment produces products and provides maintenance, repair and overhaul services associated with aircraft engines, including thrust reversers, cowlings, nozzles and their components, and aircraft interior products, including slides, seats, cargo and lighting systems.

The Electronic Systems segment produces a range of systems and components that provide flight performance measurements, flight management information, engine controls, fuel controls, electrical power systems, safety data and reconnaissance and surveillance systems.

Products and Services

Nacelles: Nacelles is the structure surrounding an aircraft engine. Components that make up a nacelle include thrust reversers, inlet and fan cowls, nozzle assemblies, exhaust systems and other structural components. The company through its Aerostructures business designs and manufactures components of a nacelle, dress the engine systems, and coordinate the installation of the engine and nacelle to the aircraft.

Actuation systems: Actuation systems are equipments that utilize linear, rotary or fly-by-wire actuation to control movement. The company manufactures a range of actuators, including primary and secondary flight controls, helicopter main and tail rotor actuation, engine and nacelle actuation, utility actuation, precision weapon actuation and land vehicle actuation.

Landing gear: The company offers landing gear systems for commercial, general aviation and defense aircraft.

Aircraft wheels and brakes: The company offers aircraft wheels and brakes for a variety of commercial, general aviation, and defense applications.

Engine control systems: The company offers applications for commercial engines, large and small, helicopters and all forms of military aircraft. Its products include fuel metering controls, fuel pumping systems, electronic controls (software and hardware), variable geometry actuation controls, and engine health monitoring systems.

Intelligence surveillance and reconnaissance systems: The company offers custom engineered electronics, optics, shortwave infrared cameras and arrays, and electro-optical products and services for defense, scientific and commercial applications.

Sensor systems: The company offers aircraft and engine sensors that provide critical measurements for flight control, cockpit information, and engine control systems.

Power systems: The company offers aircraft electrical power systems for large commercial airplanes, business jets and helicopters. It supplies these systems to

defense and civil customers worldwide.

Customers

The company's customers include the United States (U.S.) government, Airbus, and Boeing.

Competition

Actuation and Landing Systems

Wheels, Brakes and Brake Control Systems: The company competes with Honeywell International Inc.; Messier-Bugatti (a subsidiary of SAFRAN); Meggitt Aircraft Braking Systems; Crane Co.; and Triumph Group Inc.

Landing Gear: The company competes with Messier-Dowty (a subsidiary of SAFRAN), Liebherr-Holding GmbH; Heroux-Devtek Inc.; APPH Ltd; Sumitomo Precision; GE Aviation; and Loud Engineering.

Flight Control Actuation: The company competes with Parker Hannifin Corporation; United Technologies Corporation; Liebherr-Holding GmbH; Moog Inc.; Nabtesco Aerospace, Inc.; and Woodward Governor Company.

Power Transmission Systems: The company competes with Kamatics (a subsidiary of Kaman Corporation); Pankl Aerospace Systems Inc. (a subsidiary of Pankl Racing Systems AG);

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
