Abstracts

Goodyear Tire & Rubber Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Goodyear Tire & Rubber Co. and its competitors. This provides our Clients with a clear understanding of Goodyear Tire & Rubber Co. position in the [Auto Parts](#) Industry.

The report contains detailed information about Goodyear Tire & Rubber Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Goodyear Tire & Rubber Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Goodyear Tire & Rubber Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Goodyear Tire & Rubber Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Goodyear Tire & Rubber Co. business.

About Goodyear Tire & Rubber Co.

The Goodyear Tire & Rubber Company engages in the development, manufacture, marketing, and distribution of tires and related products and services worldwide. The company also manufactures and markets rubber-related chemicals for various applications.

The company operates commercial truck service and tire retreading centers. In addition, it operates approximately 1,500 tire and auto service center outlets where it offers its products for retail sale and provides automotive repair and other services. The company manufactures its products in 57 manufacturing facilities in 23 countries, including the United States, and has marketing operations in various countries worldwide. The company manufactures and sells tires under the Goodyear, Dunlop, Kelly, Fulda, Debica and Sava brands, and various other Goodyear owned 'house' brands, and the private-label brands of certain customers.

Segments

The company operates its business through four operating segments representing its regional tire businesses: North American Tire; Europe, Middle East and Africa Tire (EMEA); Latin American Tire; and Asia Pacific Tire.

NORTH AMERICAN TIRE

The North American Tire segment develops, manufactures, distributes, and sells tires and related products and services in the United States and Canada. North American Tire manufactures tires in eight plants in the United States and two plants in Canada.

North American Tire manufactures and sells tires for automobiles, trucks, motorcycles, buses, earthmoving and mining equipment, commercial and military aviation and industrial equipment, and for various other applications.

Goodyear brand radial passenger tire lines sold in the United States and Canada include Assurance, Assurance Fuel Max, Assurance featuring TripleTred Technology, and Assurance featuring ComforTred Technology for the premium market; Eagle, for the high performance market, and RunOnFlat extended mobility technology (ROF or EMT) tires. The major lines of Goodyear brand radial tires offered in the United States and Canada for sport utility vehicles and light trucks are Wrangler featuring technologies, including MT/R with Kevlar, and DuraTrac; and Fortera featuring TripleTred Technology. Goodyear also offers Dunlop brand radial passenger tire lines, including Signature and SP Sport performance tires, and Dunlop brand radials for light trucks, such as the Rover and Grandtrek lines. Additionally, North American Tire also manufactures and sells various lines of Kelly and Fierce brands, as well as house and private brand radial passenger and light truck tires in the United States and Canada.

North American Tire manufactures and sells all-steel, radial medium truck tires under the Goodyear, Dunlop, and Kelly brands, for use on commercial trucks and trailers. North American Tire also retreads truck, aviation and off-the-road (OTR) tires, primarily as a service to its commercial customers; manufactures tread rubber and other tire retreading materials for trucks, heavy equipment and aviation; provides automotive maintenance and repair services at approximately 700 retail outlets primarily under the Goodyear or Just Tires names; provides trucking fleets with new tires, retreads, mechanical service, preventative maintenance and roadside assistance from 178 Wingfoot Commercial Centers; sells automotive repair and maintenance items, automotive equipment and accessories and other items to dealers and consumers; sells chemical and natural rubber products to other business segments and to unaffiliated customers; and provides miscellaneous other products and services.

EUROPE, MIDDLE EAST AND AFRICA TIRE

The Europe, Middle East and Africa Tire (EMEA) segment develops, manufactures, distributes, and sells tires for automobiles, motorcycles, trucks, farm implements, and construction equipment throughout Europe, the Middle East, and Africa, exports tires to other regions of the world and provides miscellaneous other products and services. EMEA manufactures tires in 16 plants in England, France, Germany, Luxembourg, Poland, Slovenia, South Africa, and Turkey.

EMEA manufactures and sells Goodyear, Debica, Sava, Dunlop and Fulda brands a

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
