The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gramercy Capital Corp. business.

About Gramercy Capital Corp.

Gramercy Capital Corp. operates as a commercial real estate specialty finance company that focuses on the direct origination and acquisition of whole loans, subordinate interests in whole loans, mezzanine loans, preferred equity, and net lease investments involving commercial properties throughout the United States.

The company invests in a diversified portfolio of real estate loans and securities, including permanent loans, bridge loans, subordinate interests in whole loans, mezzanine loans, distressed debt, mortgage-backed securities (MBS) preferred equity, and net lease investments involving commercial properties throughout the United States.

The company finances assets through various techniques, including repurchase agreements, secured and unsecured credit facilities, CDOs, unsecured junior subordinated corporate debt, issuances of commercial mortgage-backed securities (CMBS), and other structured financings.

Targeted Investments

Permanent Loans: The company originates fixed-rate permanent whole loans. It

separates certain of these loans into tranches, which can be securitized and resold.

Bridge Loans: The company offers floating rate bridge whole loans to borrowers who are seeking debt capital, which may be used in the acquisition, construction or redevelopment of a property. Bridge financing enables the borrower to employ short-term financing while improving the operating performance and physical aspects of the property and avoid burdening it with restrictive long-term debt. The bridge loans it originates are secured by first mortgage liens on the property and are expected to provide interest rates ranging from 125 to 400 basis points over applicable index rate indexes.

Subordinate Interests in Whole Loans: The company purchases from third parties, and may retain from whole loans it originates and co-originates and securitizes or sells, subordinate interests in whole loans.

Mezzanine Loans: The company originates mezzanine loans that are senior to the borrower's equity in, and subordinate to a mortgage loan on, a property. These loans are secured by pledges of ownership interests, typically in whole but occasionally in part, in entities that directly or indirectly own the real property.

Distressed Debt: The company may also invest in distressed debt, most often sub- and non-performing real estate loans acquired from financial institutions. It makes these investments when its underwriting, credit, financing and asset management experience enable it to generate above-average risk-adjusted returns by resolving these distressed loans expeditiously through refinancings, negotiated repayments with borrowers or foreclosure and subsequent sale of the underlying property.

Mortgage-Backed Securities: The company acquires mortgage MBS that are created when commercial or residential loans are pooled and securitized. These securities may be issued by government sponsored agencies or other entities, and may or may not be rated investment grade by rating agencies. It may also originate MBS from pools of commercial loans.

Preferred Equity: The company originates preferred equity investments in entities that directly or indirectly own commercial real estate. Preferred equity is not secured, but holders have priority relative to common equity holders on cash flow distributions and proceeds from capital events.

Other Real Estate-Related Investments: The company may also makes investments in

other types of commercial or multi-family real estate assets. These may include acquisitions of real property and debt issued by REITs or other real estate companies. It has authority to issue its common stock or other equity or debt securities in exchange for assets. Subject to gross income and asset tests necessary for REIT qualification, it may also invests in securities of other REITs, or other entities engaged in real estate activities or securities of other issuers, including for the purpose of exercising control over such entities.

The company has established a real estate securities business that would focus on the acquisition, trading and financing of CMBS and other real estate related securities.

Tax Status

The company has elected to be taxed as a real estate investment trust (REIT) as such it distributes its income to stockholders.

History

Gramercy Capital Corp. was founded in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
