Such information creates your awareness about principal trends of Great Florida Bank business.

About Great Florida Bank

Great Florida Bank provides a range of consumer and commercial banking services to individuals, businesses and industries.

The basic services offered by the company include interest-bearing and noninterest-bearing demand deposit accounts, saving, money market deposit accounts, NOW accounts, time deposits, credit cards, cash management, direct deposits, notary services, night depository, cashier's checks, domestic collections, bank drafts, and automated teller services. In addition, the company makes secured and unsecured commercial, consumer, and real estate loans and issues stand-by and commercial letters of credit. It provides automated teller machine (ATM) cards and is a member of the Star, Presto, Jeanie and Cirrus ATM networks, thereby permitting customers to utilize the convenience of larger ATM networks. It also offers the foregoing services.

Lending Activities

The company offers a range of lending services, including: land, land development and real estate construction, consumer and commercial loans, to individuals, small businesses and other organizations that are located in or conduct a substantial portion of their business in its market area.

The company's commercial loan portfolio includes loans to individuals and small-to-medium sized businesses located primarily in Miami-Dade, Broward and Palm Beach counties for working capital, equipment purchases, and various other business purposes. Its real estate loans are secured by mortgages and consist primarily of loans to individuals and businesses for the purchase, improvement of or investment in real estate and for the construction of single-family residential units, the development of single-family residential building lots and the construction of commercial properties. The company's consumer loan portfolio consists primarily of loans to individuals for various consumer purposes.

Investment Activities

The company invests a portion of its assets in U.S. government agency obligations, mortgage-backed securities and federal funds sold.

Correspondent Banking

The company purchases correspondent services offered by larger banks, including check collections, federal funds purchases and sales, security safekeeping services, investment services, and coin and currency services. Additionally, it sells loan participations to correspondent banks with respect to loans which exceed its legal lending limit. The company also purchases participations in loans and loan syndications from and with other financial institutions.

Data Processing

The company licenses its core banking software and operates the software in-house. The licensed software provides an automated general ledger system, loan accounting system and deposit accounting system.

History

Great Florida Bank was founded in 2004.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
