Abstracts

Great Western Minerals Group, Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Great Western Minerals Group, Ltd. and its competitors. This provides our Clients with a clear understanding of Great Western Minerals Group, Ltd. position in the Industry.

The report contains detailed information about Great Western Minerals Group, Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Great Western Minerals Group, Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Great Western Minerals Group, Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Great Western Minerals Group, Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Great Western Minerals Group, Ltd. business.

About Great Western Minerals Group, Ltd.

Great Western Minerals Group Ltd., through its subsidiaries, engages in the acquisition, exploration, and development of metal properties in North America and South Africa. It explores for rare earth elements, base metals, and precious metals. The company also manufactures and supplies various specialty alloys, powders, and related products, which contains aluminum, copper, nickel, cobalt, and the rare earth elements, used in the aerospace, automobile, industrial, computer, and high-tech industries.

The company's wholly-owned subsidiary, GWUS Inc., holds the interest in the Deep Sands property. In 2008, the company acquired Less Common Metals Ltd. (LCM) of Birkenhead, United Kingdom through a newly created wholly-owned subsidiary, LCMG Ltd. (LCMG). LCM is a global manufacturer and supplier of rare earth based alloys, metals, and indium.

Mineral Interests

Hoidas Lake: The company holds a 100% interest in the Hoidas Lake rare earth property. The property consists of 14 claims totaling 12,522 hectares.

Deep Sands Project: The company holds a 25% interest in rare earth elements (REE) contained in a heavy mineral sands project in Utah.

Douglas River: The company owns 100% interests in two mineral dispositions in the Douglas River area of Saskatchewan.

Knee Lake: The company owns the Knee Lake project, a northern Saskatchewan property. The property acquired both mining and quarrying leases over the calcium carbonate body.

Benjamin River: The company entered into an option agreement with a third party to acquire a 100% working interest in a Rare Earth Elements property (the Benjamin River Property) in the Province of New Brunswick. The Benjamin River Property covers 55 claims totaling 880 hectares (ha) and hosts an apatite-diopside-magnetite vein that has been traced on surface for 800 meters along strike, with an apparent width of up to 50 meters.

Rareco Project: In December 2008, the company entered into an Option Agreement with Rare Earth Extraction Co. Ltd. (Rareco) of Stellenbosch, South Africa.

Significant Events

On October 15, 2009, Black Range Minerals Ltd. has entered an agreement with Great Western Minerals Group Ltd. whereby Great Western has the right to earn an interest in the Koonenberry Base Metal Project in New South Wales by managing and funding exploration at the project. The agreement concerns Black Range's exploration licences EL6400 and EL6464 in NSW, covering 600 square kilo meters.

History

Great Western Minerals Group was incorporated in 1983.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?
Rare?
Costly to imitate?
Organized properly?
