term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Greensmart Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Greensmart Corp. business.

### **About Greensmart Corp.**

Greensmart Corporation, through its subsidiary, AgroCan (China), Inc., produces compound fertilizers, which are custom-made to suit local conditions, such as plant, soil, and climate.

On May 13, 2003, the company executed an Asset Acquisition Agreement with Winsmart Development Limited. The basic terms of the agreement are that it issued to Winsmart 29,868,737 shares of its common stock and Winsmart sold the company approximately 553,212 young eucalyptus trees planted in a total of 340 leased hectares and a tree seedlings and nursery farm with annual production capacity of 10 million seedlings situated on 3.3 leased hectares.

The Company, through AgroCan (China) Inc. owns 100% interest in two wholly-owned subsidiaries, Guangxi Linmao Fertilizer Company Limited (Guangxi Linmao) and Jiangxi Jiali Chemical Industry Company Limited (Jiangxi Jiali). The Company, through AgroCan (China) Inc., also own a 70% interest in Jiangxi Fenglin Chemical Industry Company Limited, a Sino-Foreign Equity Joint Venture (Jiangxi Fenglin). All of the aforementioned entities are located in the People's Republic of China (China or the PRC).

The Company's Compound fertilizers are the end product made from the combination of

the three primary nutrients: nitrogen, phosphate, and potassium, together with other elements, such as iron, zinc, copper, and manganese. These elements are blended in different proportions, and are made into pellets and packed into 50 kilogram bags. Fertilizer applications include mainly paddy rice, wheat, corn, sugar cane, tobacco, cotton, vegetables, tree plantation, and fruit trees.

As of June 30, 2003, the company has established an annual production capacity of 125,000 metric tons for compound fertilizers in Guangxi and Jiangxi, two of the major agricultural provinces in China, and it intends to enter markets in other provinces in China.

The company's fertilizers are sold under the brand name 'AgroCan Three Leaves'. The Company's main customers for the fertilizers comprise the farming supply bureaus and cooperatives under the State Internal Trade Bureau of the People's Republic of China. These entities act as wholesalers to individual farmers. State-owned farms and plantations are also major accounts of the company. The company competes with Agrium, Inc., Cargill Group, Norsk Hydro Group, Kemira Agro Group, BASF Group, Marubeni Corporation, Mitsubishi Corporation, Canpotex, Ltd., and Sinochem Group.

## History

GreenSmart Corporation was founded in 1996. It was formerly known as AgroCan Corporation and changed its name to GreenSmart Corporation in 2003.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
