The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Groundstar Resources Ltd. business.

About Groundstar Resources Ltd.

Groundstar Resources Limited, a development stage company, engages in the exploration, development, production, and acquisition of petroleum and natural gas interests in Guyana, the Middle East, and North Africa.

Subsidiaries

The company's subsidiaries include: Groundstar Resources (Cayman) Inc.; Groundstar Resources Inc. (Guyana Company); Groundstar Resources International Inc.; Groundstar Resources (BVI) Inc.; Groundstar Resources Egypt (Barbados) Inc.; and Groundstar Resources Kurdistan Ltd.

Properties

The company's principal oil and gas properties are located in Guyana, Egypt, Syria, and Iraq.

Guyana

Takutu Basin: The company has a petroleum prospecting license (PPL) encompassing

9,800 square kilometers in the Takutu Basin. It relinquished 20% of the PPL in 2007, leaving a remaining area of 7,800 square kilometers extending from the Brazilian border eastward to the Rewa River.

In May, 2009, a new Petroleum Agreement was signed between the company and the Government of Guyana, approving the 7,800 square kilometers PPL, including two phases extending to 2012.

Egypt

WEEM Block: The company acquired a 20% interest in the WEEM Block in the southern Gulf of Suez region, which covers 1,328 square kilometers on a western arm of northwest trending Gulf of Suez rift system.

In 2008, the company participated in two exploration wells on the WEEM Block, including Aminex et al Malak – 1 and NW Tanan – 1, and drilled the third well on the South Malak Prospect in 2009.

WKO Block: The company has 60% working interest in WKO Block in the on-shore Upper Egypt region, which covers an area of 42,291 square kilometers. As of April 30, 2009, the company in the WKO Block and performed its first relinquishment, retaining an area of 31,521 square kilometers.

Syria

The company was awarded two exploration blocks by the Syrian Petroleum Company, including Block XIV and XVI, which cover an area of approximately 1.36 million hectares.

Iraq – Kurdistan

The company, through a wholly-owned subsidiary, is a member of a consortium operated by Niko Resources Ltd. The consortium has entered into a production sharing contract with the Kurdistan Regional Government for the exploration, development, and production of petroleum substances in the 846 square kilometer Qara Dagh Block in the Federal Region of Kurdistan, Iraq.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
