The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Grupo Financiero Galicia S.A. business.

About Grupo Financiero Galicia S.A.

Grupo Financiero Galicia S.A. operates as a financial services holding company in Argentina. Banco Galicia is the company's main subsidiary, which operates as a full-service bank in Argentina.

The company, through the operating subsidiaries of Tarjetas Regionales S.A., provides proprietary brand credit cards and consumer finance services throughout Argentina. Through Sudamericana Holding S.A. and its subsidiaries, the company provides insurance products in Argentina.

Business

Banking

Banco Galicia provides, directly or through its subsidiaries, a variety of financial products and services to large corporations, small- and medium-sized companies (SMEs), and individuals. The bank's customer base reaches approximately 1.8 million customers, who are comprised of mostly individuals but who also included approximately 44,000 companies.

Wholesale Banking

The Wholesale Banking Division is in charge of the bank's business with the corporate sector. It provides financial services and products to companies of all sizes and across all sectors of the economy. Wholesale Banking provides personalized advice and a variety of commercial banking and investment banking products, to provide working capital and to finance middle and long term investment projects and international trade.

Middle-Market Banking: Middle-Market Banking provides services to businesses with annual sales of approximately Ps. 1 million, excluding multinationals or subsidiaries of multinationals or global companies. This unit offers its customers a range of financial products, including deposit taking and lending including general commercial loans, working capital loans, trade finance, on-lending of funds originated in other entities, overdraft credit lines, mortgage loans, and leasing services, transactional services, such as pay roll direct deposit, collections, and corporate credit cards, as well as the Galicia Rural card, a proprietary card developed by the bank especially for the agribusiness sector. Middle Market Banking is divided into three different units, each of which provides services modified to companies particular needs based on such companies' annual sales, and has a special unit specializing in providing services to the agricultural and livestock sector.

Corporate Banking: Corporate Banking serves corporations and multinationals or subsidiaries of multinationals or global companies. This business unit offers clients a range of services modified to fit their specific needs, including deposit-taking and lending, trade finance, general commercial and syndicated loans, working capital loans, letters of credit, collections and treasury services, and payroll direct deposit.

Capital Markets and Investment Banking: These units focus on the integral development of complex capital markets and investment banking products and services for the Wholesale Banking Division's customers. These services include strategic advice, capital raising through equity and debt securities, securitizations, debt restructuring, structured finance, and M&A advice.

International Trade: The bank's international trade services include documentary and stand by letters of credit, guarantees, documentary collections, payment order processing, as well as the possibility of financing trade related transactions. These services are supplemented by Galicia Factoring y Leasing S.A., a wholly owned subsidiary that offers international factoring services.

Non-Financial Public Sector: Through this unit, the bank provides financial services to different government areas and entities, in different districts, focusing on transactional services.

Retail Banking

The Retail Banking division manages the bank's business with individuals and with businesses, small retailers and professionals with annual revenues below Ps. 1 million. Retail Banking provides a range of financial products and services, encompassing transactions, loans, and investments. On the transactions side, the bank offers its customers checking and savings accounts, credit and debit cards, and payroll direct deposit. On the investment side, Banco Galicia's products and services include certificates of

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
