The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Grupo Mexico SA de CV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Grupo Mexico SA de CV business.

About Grupo Mexico SA de CV

Grupo Mexico, S. A. B. de C. V., together with its subsidiaries, engages in the exploration, mining, and processing of metallic and nonmetallic minerals. It primarily explores copper, molybdenum, gold, silver, lead, zinc, and sulfuric acid in Mexico, Chile, Peru, and the United States.

Segments

The company conducts its operations through three segments, including: Minera México, S. A. de C. V. (MM), Southern Copper Corporation (SCC), and Infraestructura y Transportes México (ITM).

The MM segment (open pit and underground operations) produces copper, with production of by-products of molybdenum, silver, and other material. SCC includes integrated copper extraction, smelting and refining operations, copper production, with production of by-products of molybdenum, silver, and other material, mainly in Peru and the U.S. ITM carries out railway transportation activities through its main subsidiary GFM mainly in Mexico.

Railroad Division

The Railroad Division operates through its subsidiary Infraestructura y Transportes México, S.A. de C.V. (ITM). Its main subsidiaries are Grupo Ferroviario Mexicano, S.A. de C.V. (GFM), Ferrocarril Mexicano, S.A. de C.V. (Ferromex), and Ferrosur, S.A. de C.V. (Ferrosur).

Grupo Ferroviario Mexicano, S.A. de C.V. (GFM): GFM operates railroad known as Ferromex in Mexico. Ferrocarril Mexicano has a network of 8,111 kilometers of tracks that covers approximately 71% of the Mexican territory. Ferromex lines connect to five border points with the United States, and also connect to four ports in the Pacific Coast and two in the Gulf of Mexico. Ferromex is controlled by the company (55.5%), Union Pacific (26%), and Grupo Carso-Sinca Inbursa (18.5%).

Intermodal México, S.A. de C.V.: The company develops and provides multimodal services and logistics for freight transportation. Intermodal México has facilities in Guadalajara, Monterrey, Torreón, Silao, Saltillo, and is in the process of building other facilities in major cities in central and northern Mexico.

Texas Pacifico, Inc.: Holds and operates a railroad in the U.S., which connects the border point of Ojinaga Mex/Presidio Texas with Dallas, Texas.

FERROSUR: The company, through its subsidiary Infraestructura y Transportes Ferroviarios, S.A. de C.V. (ITF), acquired 100% of the railroad company Ferrosur, S.A. de C.V., owned by Sinca Inbursa, S.A. de C.V. and Grupo Condumex, S.A. de C.V.

Mining Division

This division primarily engages in mining and operates as an integrated producer of copper products in Mexico and Peru. The Mining Division is consolidated through Americas Mining Corporation (AMC), a sub-holding company that groups the mining operations in Mexico, Peru, and the United States. Also, GMEXICO conducts exploration activities in Mexico, Peru, and Chile.

Americas Mining Corporation (AMC): The company, through Americas Mining Corporation, operates as an integrated copper producer. It also produces molybdenum, silver, and zinc. The company operates mining units and metallurgical plants.

Minera México, S.A. de C.V. (MM): Minera Mexico produces copper, zinc, silver, gold, and molybdenum. MM is a holding company and all of its operations are conducted

through subsidiaries that are grouped into three separate units. The Mexicana de Cobre Unit operates an open-pit copper mine. It also operates a Metallurgical Complex consisted of a 90,000 metric tons per day of copper ore Concentrator Plant, a 22,000 metric tons. per year Solvent Extraction-Electro Winning (SX/EW) Refinery Plant, a 300,000 metric tons per year copper smelter, a 300,000 metric tons per year Refinery Plant, a 150,000 metric tons per year Rod Plant, and a 15 million ounces per year of silver and 100,000 ounces per year of gold Precious Metals Refinery Plant. The Cananea Unit operates an open-pit copper mine, a 80,000 metric tons per day of Copper Concentrator, and two Solvent Extraction-Electro Winning (SX/EW) Refineries with a combined capacity of 55,000 metric tons per year of electro winning copper. The Industrial Minera Mexico Unit consists of five underground mines located in central and northern Mexico where zinc, copper, silver, and gold are mined. This Unit includes an industrial processing facility for zinc and copper in San Luis Potosi and an underground mine, San Martin, as well as Charcas, zinc producing mine.

Southern Copper Corporation (SCC): The company controls 75.1% of SCC through its subsidiary Americas Mining Corporation (AMC). The Peruvian mining operations comprise by two open pit mines and the metallurgical complex. An open pit mine in Toquepala, Peru, with a daily capacity of 63,000 metric tons of copper ore, and an open pit mine in Cuajone, with a daily capacity of 80,000 metric tons of copper ore concentrate.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
