This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes GTX Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of GTX Inc. business.

About GTX Inc.

GTx, Inc., a biopharmaceutical company, engages in the discovery, development, and commercialization of small molecules that selectively target hormone pathways to treat cancer, osteoporosis and bone loss, muscle loss, and other serious medical conditions.

Marketed Product

The company markets FARESTON (toremifene citrate) 60 mg tablets, approved for the treatment of metastatic breast cancer in postmenopausal women in the United States. Toremifene is a SERM owned and manufactured by Orion Corporation (Orion). Toremifene is the active pharmaceutical ingredient in FARESTON and is being developed in two separate clinical programs for toremifene 80 mg and toremifene 20 mg.

The company sells FARESTON primarily through wholesale drug distributors. Its primary distributors include McKesson Corporation, Cardinal Health, Inc., and AmerisourceBergen Corporation.

Product Candidates

Toremifene

The company's advanced product candidate, toremifene, is a selective estrogen receptor modulator (SERM). It is developing toremifene citrat in two separate clinical programs in men: first, toremifene 80 mg in a completed pivotal Phase III clinical trial for the prevention of bone fractures and treatment of other estrogen deficiency side effects of androgen deprivation therapy (ADT), in men with prostate cancer, and second, toremifene 20 mg in an ongoing pivotal Phase III clinical trial for the prevention of prostate cancer in high risk men with precancerous prostate lesions called high grade prostatic intraepithelial neoplasia, or high grade PIN. Under a license and supply agreement with Orion, Orion manufactures and supplies it with FARESTON, the 60 mg dose of toremifene citrate, for sale in the United States to treat metastatic breast cancer in postmenopausal women, as well as toremifene 20 mg for its Phase III clinical trial for the prevention of prostate cancer in high risk men with high grade PIN.

The company has licensed to Ipsen Developments Limited (Ipsen), rights in the European Union, Switzerland, Norway, Iceland, Lichtenstein and the Commonwealth of Independent States to develop and commercialize toremifene in various indications.

Ostarine for the Treatment of Cancer Cachexia

Ostarine is an oral nonsteroidal agent designed to have anabolic activity on muscle and bone without unwanted side effects on prostate and skin. The company has completed Phase II clinical trial for treatment of Cancer Cachexia.

LH Inhibitor

The company is developing GTx-758, an oral luteinizing hormone (LH) inhibitor for the treatment of advanced prostate cancer. In February 2010, the company initiated a Phase II clinical trial evaluating the ability of GTx-758 to reduce testosterone to castrate levels in 70 subjects.

Competition

The company's competitors include Eli Lilly & Co., Merck, Novartis, Sanofi-Aventis, Procter & Gamble, Amgen, Pfizer, Inc., Boehringer Ingelheim, Bristol Myers Squibb, GlaxoSmithKline, Abbott Laboratories, Ligand Pharmaceuticals, and Cytokinetics, Inc.

History

GTx, Inc. was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
