Abstracts

Gujarat Mineral Development Corporation Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gujarat Mineral Development Corporation Limited and its competitors. This provides our Clients with a clear understanding of Gujarat Mineral Development Corporation Limited position in the [Metals and Mining](#) Industry.

The report contains detailed information about Gujarat Mineral Development Corporation Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gujarat Mineral Development Corporation Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gujarat Mineral Development Corporation Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows

presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gujarat Mineral Development Corporation Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gujarat Mineral Development Corporation Limited business.

About Gujarat Mineral Development Corporation Limited

Gujarat Mineral Development Corporation Limited engages in the production and sale of lignite in India. Its mineral properties primarily include Panandhro lignite mine, located in Kutch district of northern Gujarat; Rajpardhi lignite mine, located in Bharuch district; and Mata-no-Madh and Umarsar lignite projects, consisting of approximately 600 hectares.

Properties

Lignite Projects

Lignite - popularly termed as 'Brown Gold' all over the world. Gujarat is rich in high grade Lignite. To explore this GMDC brought in one of the mining technology in this field - TAKRAF of Germany. GMDC's operations have expanded geographically to other Indian States.

PANANDHRO: Large reserves of Lignite, a valuable energy mineral, are located in

Kutch district of northern Gujarat . Deposits of 200 million tones of lignite have been identified at different locations and geological investigations are on to locate more lignite. Panandhro, the largest of these pockets, has been developed as major mining center of Lignite which is used as a fuel in a large number of process boilers in the state as well as to produce power to meet ever. The mining activity was started here in 1974 and substantial expansion was undertaken in 1988,89 and 90.

Current production from Panandhro Mine is about 50 lakh tonnes per Year. This lignite is being supplied not only GEB's Power Station at Panandhro but also to over 2000 industrial units (textiles, chemicals, Ceramics, bricks, captive power etc.) all over the state.

RAJPARDI: Large requirement of lignite as solid fuel for South Gujarat Industries is partially met by Rajpardi lignite mine of GMDC. As the deposit is coparatively small (about 15 million tonnes) and overburden is much higher compare to Panandhro Lignite Mine, production is limited to about 3.5 lakh tonnes per year. Lignite is excavated from depth as much as 60 metres which also requires large volume pumping of water.

Mata-no-Madh & Umarsar Lignite Projects: To cater to the ever increasing demand of lignite, it is proposed to commence operations at the Mata-no-Madh deposits at an early date About 40 million tons lignite reserves are available in this deposits covering an area of about 600 hectares. The preliminary work of overburden removal has already commenced. It is planned to start lignite production by early 1998. With the initial capacity of 10 lakh tpy the total project cost is estimated at Rs.20 crores.

FLUORSPAR PROJECT

KADIPANI: As much as 11 million tonnes of low grade(20% of CaF₂) is available in the hills of Ambadunger. Low grade ore is extracted in the open pit mine and is upgraded, through froth-flotation process, in a 500 tpd beneficiation plant to produce 96% CaF₂ Acid Grade and 90% Caf₂ Metallurgical Grade.

OTHER PROJECTS

Naredi & Bhatia Bauxite Project: Large reserves of high & low grade bauxite are found in Kutch district as well as Jamnagar dist. GMDC has been mining bauxite in these two centres (Naredi in Kutch and Bhatia in Jamnagar) since last two decades. Average total bauxite output is about one lakh tonne per year. High Grade bauxite is being marketed to refractory industries, chemical industries etc. all over the country some quantity of low

grade is being exported from time to time.

Gadhshisha Calcination Project: In order to produce further value-added material from high grade bauxite, Corporation has set-up Calcination plant at Gadhshisha where bauxite is calcined at high temperature in a rotary kiln. The plant capacity is 50,000 tonnes of Calcined Bauxite per year. This calcined bauxite is suitable to heavy duty refractories.

Ambaji Multi Metal Project: The multi metal project at Ambaji commenced operation in 1992. The deposits contain concentrates of metals like Copper, Lead and Zinc and reserves of 7.2mt have been proved. The company sold concentrates to Hindustan Zinc Ltd. in FY1994. However, no sales effected there after due to difficulty in the smelters of Hindustan Zinc and increased use of imported concentrates. The company is currently investigating various processing options of the ore available from deposit including production of bulk concentrates for marketable and/or productions of metals. Possible technical / commercial tie-up to develop the project is under investigation.

Strategic Alliances

RBG Minerals Industries Ltd, a joint venture company promoted by Rajasthan State Mines and Minerals Ltd. (RSMML), Gujarat Mineral Development Corp. Ltd. (GMDC) and Binani Zinc Limited would jointly develop Ambaji Group of Mines comprising Ambaji, Deri and Basantgarh base metal mines such as copper, lead and zinc.

History

The Gujarat Mineral Development Corporation Limited was founded in 1963.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
