Abstracts

Gulf Western Petroleum Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gulf Western Petroleum Corporation and its competitors. This provides our Clients with a clear understanding of Gulf Western Petroleum Corporation position in the Industry.

The report contains detailed information about Gulf Western Petroleum Corporation that gives an unrivalled in-depth knowledge about internal businessenvironment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gulf Western Petroleum Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gulf Western Petroleum Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gulf Western Petroleum Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gulf Western Petroleum Corporation business.

About Gulf Western Petroleum Corporation

Gulf Western Petroleum Corporation, a development stage company, engages in the exploration and development of oil and natural gas reserves in the United States.

The company holds oil and gas lease interests in Texas, Kansas and Kentucky. The company engages in the drilling of Frio formation wells in Dewitt and Lavaca County, Texas. It also holds proved undeveloped reserves in Wharton County, Texas; and it engages in a supply and infrastructure development program in Southeast Kansas.

Properties

Oakcrest Prospect (Wilcox Formation), Wharton County, Texas: The Oakcrest Prospect is located in south central Texas, approximately 75 miles southwest of Houston, Texas. The company holds oil and gas lease interests in approximately 866 acres with a working interest of 95.75%.

Texas Shamrock and Brushy Creek Projects (Frio Formation), Dewitt and Lavaca Counties, Texas: The company's Texas Frio formation wells comprise Shamrock and

Brushy Creek Projects. The company is participating in the drilling of a minimum of 12 Frio-age natural gas wells located in Dewitt and Lavaca Counties, Texas.

Shamrock Project

The Shamrock Project is a five well drilling program located in Dewitt County, Texas that is targeting Frio-age natural gas reserves that have been identified through 3-D seismic. Frio-age wells have proven to be prolific natural gas producers throughout the Texas Gulf Coast region. Typical Frio wells produce at approximately 200 to 250 Mcf per day with estimated total recoverable reserves of approximately 500 MMcf. The company holds an average 65.0% working interest in the wells.

Brushy Creek Project

The Brushy Creek Project is a 3-D seismic controlled project situated in the prolific Oligocene Frio oil and natural gas trend located in the lower Texas Gulf Coast. The company holds interests in seven Brushy Creek Project wells, and is evaluating the participation in three additional Frio wells scheduled for drilling. The company's working interests in the existing seven drilled wells is 34.4%.

Mound Branch Reserve and Infrastructure Development Project, Elk County, Kansas: The company owns Orbit Energy, LLC's ('Orbit') working interests in approximately 8,800 gross acres located in Elk County, Kansas together with its interests in certain drilled wells and associated equipment.

The Mound Branch Project is a natural gas reserve and gathering system development project of existing and after acquired oil and gas lease acreage, and existing wellbores previously drilled by Orbit and its working interest partners. The Mound Branch Project consists of a three year drilling program to drill fifty wells per year and for the construction of a 15-mile low pressure gathering system. The required gathering system would have design capacity of 8,000 Mcf per day, and is necessary for the delivery of existing and expected prospective well head production into the interstate natural gas pipeline grid in Kansas. Orbit serves as the operator of the Mound Branch Project.

Other Prospects

Baxter Bledsoe Prospect, Clay County, Kentucky: On February 1, 2006, the company purchased the Baxter Bledsoe Prospect oil and gas lease acreage from CodeAmerica. The prospect has approximately 2,200 acres located in Clay County, Kentucky.

Bell Prospect, Bell County, Kentucky: On October 1, 2006, the company acquired from CodeAmerica oil and gas lease interests located in Bell County, Kentucky. It comprised of approximately 3,400 acres.

History

Gulf Western Petroleum Corporation was founded in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources Financial

Physical

Technological

Organizational

Intangible resources Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
