Abstracts

Gushan Environmental Energy Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Gushan Environmental Energy Limited and its competitors. This provides our Clients with a clear understanding of Gushan Environmental Energy Limited position in the [Energy](#) Industry.

The report contains detailed information about Gushan Environmental Energy Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Gushan Environmental Energy Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Gushan Environmental Energy Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented

on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Gushan Environmental Energy Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gushan Environmental Energy Limited business.

About Gushan Environmental Energy Limited

Gushan Environmental Energy Limited is a commercial biodiesel producer in China. The company's annual biodiesel production capacity was 450,000 tons, as of December 31, 2009.

The company produces biodiesel and by-products of biodiesel production, including glycerine, plant asphalt, erucic acid and erucic amide. The by-products of biodiesel production have various commercial applications in the food, pharmaceutical, and manufacturing industries.

Products

The company's biodiesel production process generates biodiesel and the by-products of biodiesel production, such as glycerine, a distillation residue of biodiesel production known as plant asphalt, erucic acid and erucic amide, which have various commercial applications. The company's products include

Biodiesel: a renewable, clean-burning and biodegradable alternative to diesel and a raw material in the chemical industry, which can be used to power a range of diesel vehicles, including trucks, mass transit vehicles and marine vessels and can be used as fatty acid methyl ester to produce chemical products;

Glycerine and refined glycerine: a colorless, odorless, nontoxic liquid with various uses, including use in foods and beverages;

Plant asphalt: as fuel for boilers, casting plaster and a stain remover;

Erucic acid: a fatty acid that can be extracted from rapeseed and used in the production of lubricants and polyesters;

Erucic amide: an anti-felt, anti-static agent for fabrics and a plastics lubricant;

Stearic acid: a fatty acid used in making plastics, soaps, cosmetics and candles; and

Fatty acid methyl ester: an intermediate product sold to the chemical industry.

Customers

The company's biodiesel customers are based in China and can be classified into three major groups: direct users, petroleum wholesalers, and individual retail gas stations. Direct users include marine vessel operators, chemical companies, and factories. Petroleum wholesalers purchase biodiesel from the company for subsequent distribution to individual gas stations. Petroleum wholesalers include local subsidiaries of state-owned enterprises or privately owned companies.

The company's by-products customers are based in China and include direct customers and chemical trading companies. Direct customers include manufacturers in various industries, such as the foundry industry, pharmaceutical industry, and food industry.

Competition

The company's domestic competitors include China Biodiesel International Holding Co., Ltd.; China Clean Energy Inc.; East River Energy Resources and Science Technology (Zhejiang) Ltd.; China Petroleum and Chemical Corporation; China National Offshore Oil Corporation; and PetroChina Co. Ltd.

History

Gushan Environmental Energy Limited was founded in 2001.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
