Abstracts

Halma plc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Halma plc and its competitors. This provides our Clients with a clear understanding of Halma plc position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Halma plc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Halma plc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Halma plc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Halma plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Halma plc business.

About Halma plc

Halma p.l.c., a holding company, engages in the development and marketing of products that are used to improve public safety and minimize hazards at work. It operates in six segments that include Fire and Gas detection; Water leak detection and UV treatment; Elevator and Door Safety; Bursting discs and sequential locking for Process Safety; High power electrical Resistors; and Optics and Specialist technology.

Fire and Gas

Fire and Gas segment provides duct detectors and control relays, smoke and heat detectors, beam detectors, specialist extinguishing systems, audio/visual warning signals, industrial heaters, fans, drying systems, heat tunnels, loudspeakers, and microphones.

The company's commercial quality fire detection products, sold to 70 countries, protect both people and buildings from the risk of fire. It also makes specialist products for conditioning gas samples before they are analyzed. The company also offers electronic fire sounders, microprocessor based smoke detectors. Its products are sold to construction, utilities, chemicals, and telecom customers.

Water

The company has companies operating in three areas of water technology: ultraviolet (UV) light water treatment, instruments for conserving water in distribution networks and water analysis products. Its principal customers in this sector are drinking water supply companies and municipal authorities together with food and process industry manufacturers. The company also offers leak detection equipment.

Elevator and Door Safety

Elevator and Door Safety segment offers infrared and microwave sensors for controlling the opening and closing of elevator doors and automatic doors. Its door sensor products have three functions. They ensure public safety, make buildings more accessible to people with disabilities and optimise traffic within buildings.

The company also makes control systems, voice communication and visual display equipment for elevators. These businesses are based in Belgium, the UK, New Zealand, the US, Singapore and China. It offers its products to multinational and regional manufacturers, and building contractors.

Process Safety

In this sector, the company makes two types of industrial safety products. The company offers safety interlocks, products that safeguard dangerous machinery and process equipment. Its second process safety specialty is bursting discs. These devices prevent excessive pressure and protect people, the environment and process equipment from the risk of explosion. Customers for its process safety systems range from very small businesses up to the world's major corporations. It operates in the UK, the U.S. and France.

Resistors

Resistors segment supplies bursting discs, high power electrical resistors, pressure sensitive relief devices, and machinery and process safety systems. The principal applications are in rail transport, the process industries and power distribution where its products are used to safely dissipate electrical energy.

Optics and Specialist

The company makes ophthalmic instruments and lenses, for examining eyesight and

diagnosing visual defects, and optical sensing systems for measuring color, brightness and chemical properties. Its secondary focus in this sector is on high precision fluid control products for use in clinical and analytical instrumentation. Customers for its fluid technology products are primarily high-tech instrument manufacturers, mostly based in the U.S. or Europe.

Sales

The company offers its products in the United Kingdom, the Netherlands, France, the United States, Canada, Australia, New Zealand, and Singapore.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
