term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Halo Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Halo Resources Ltd. business.

About Halo Resources Ltd.

Halo Resources Ltd., a junior resource exploration company, engages in the acquisition and exploration of precious and base metals with mineral interests located in Manitoba and Ontario, Canada.

Properties

Sherridon VMS Project, Manitoba: As of August 31, 2009, the company held, or had options to earn, an interest in 20,876 hectares located in the Sherridon area, north-central Manitoba.

Red Lake District, Ontario: The company entered into various option agreements to earn mineral interests located in Ball Township, Red Lake Mining Division. It has the option to earn a 60% interest in 67 mining claims, a 45% interest in two mining claims, and a 30% interest in ten mining claims (collectively the West Red Lake Property) located in Ball Township, Red Lake, Ontario. It also has an option to earn up to a 75% interest in nine claim units (the Bridget Lake Property). The company also has an option to earn approximately a 75% interest in 87 mining claims.

Duport Property, Ontario: The company owns a 100% interest in 93 mineral claims (the

Duport Property) covering an area of approximately 3,800 hectares, located near Kenora, Ontario. It also acquired, through staking, 10 mineral claims in the area of the Duport Property, covering an area of approximately 1,744 hectares. Everton Resources Inc. has an option to earn a 51% interest in the Duport Gold Property.

Cold and Lost Lakes Claims: The company has entered into an option and joint venture agreement with Hudson Bay Mining and Smelting Co. Limited (HudBay), a subsidiary of HudBay Minerals Inc., on certain claims (the Cold and Lost Lakes Claims) located in the Sherridon VMS Project area, under which HudBay has the option to earn approximately a 67.5% joint venture interest in the Cold and Lost Lake Claims.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
