The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hamilton Bancorp Inc. business.

About Hamilton Bancorp Inc.

Hamilton Bancorp Inc (Hamilton Bancorp), incorporated in 1988 in Miami, through its subsidiary, Hamilton Bank, N.A. (Hamilton Bank), (collectively, the Company), is engaged in providing global trade finance with particular emphasis on trade with and between South America, Central America and the Caribbean (collectively, the Region) and the United States or otherwise involving the Region. Through its relationships with approximately 300 correspondent banks and with importers and exporters in the United States and the Region, as well as its location in South Florida, which is becoming a focal point for trade in the Region

The Company operates in all major countries throughout the Region and has been particularly active in several smaller markets, such as Guatemala, Ecuador, Panama and Peru.

Trade Finance Services and Products

The Company offers a wider array of trade finance products and services such as import and export letters of credit, are offered by almost all financial institutions engaged in trade finance, and most of the Company's products are offered by some financial institutions. The principal trade related products and services, which the Company

offers include:

Commercial Documentary Letters of Credit: Commercial documentary letters of credit are obligations issued by a financial institution in connection with trade transactions where the financial institution's credit is substituted for its customer, who is buying goods or services from the beneficiaries of those letters of credit.

Bankers' Acceptances: A bankers' acceptance is a time draft drawn on a bank and accepted by it. Acceptance of the draft obligates the bank to unconditionally pay the face value to whomever presents it at maturity.

Discounted Trade Acceptances: Discounted trade acceptances represent an obligation of an importer to pay money on a certain date in the future, which obligation has been accepted by the importer as payable to the exporter, then sold by the exporter at a discount to a financial institution.

Pre-Export Financing: Pre-export financing is provided by a financial institution, either directly or indirectly through a second bank, to an exporter who has a definitive international contract for the sale of certain goods or services. Such financing funds the exporter's manufacture, assembly and sale of these goods or services to the purchaser abroad.

Warehouse Receipt Financing: Warehouse receipt financing provides temporary financing, usually at a significant loan to collateral discount, for goods temporarily held in an independent warehouse pending their sale and/or delivery in a trade transaction.

Documentary Collections: The United States financial institution will assist financial institutions to collect at maturity various drafts, acceptances or other obligations which have come due and which are owed by parties abroad or in the United States.

Foreign Exchange Transactions: Foreign exchange services consist of the purchase of foreign currency on behalf of a customer. This service includes both spot and forward transactions. Such transactions may be conducted in both hard and soft currencies. The Company conducts such transactions in both types of currencies. Foreign exchange transactions are not reflected on the balance sheet and represent contingent liabilities of the Company. The Company receives fee income from foreign exchange transactions.

International Cash Management: The Company assists corporations and banks in the Region with the clearing of checks drawn on United States financial institutions. As a

United States financial institution and a member of the Federal Reserve System, Hamilton Bank is able to provide quick and efficient clearing of these items. The provision of these services often leads to the Company providing other products and services to corporations and banks.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
