Abstracts

Hardinge Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Hardinge Inc. and its competitors. This provides our Clients with a clear understanding of Hardinge Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Hardinge Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Hardinge Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Hardinge Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Hardinge Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hardinge Inc. business.

About Hardinge Inc.

Hardinge Inc. engages in the design, manufacture, and distribution of industrial-use high precision turning machine tools.

Products

The company supplies high precision computer controlled metal-cutting turning machines, grinding machines, vertical machining centers, and accessories related to those machines.

The company's Kellenberger precision grinding technology is complemented by the Hauser and Tschudin grinding brands. Hauser machines are jig grinders used to make demanding contour components, primarily for tool and mold-making applications. Tschudin product technology is focused on the specialized grinding of cylindrical parts when the customer requires high volume production. The company's Tschudin machines are generally equipped with automatic loading and unloading mechanisms for the part being machined.

The company supplies a line of machining centers addressing a range of sizes, speeds, and powers. The machining centers cut material differently than a turning machine. These machines are designed to remove material from stationary, prismatic or box-like

parts of various shapes with rotating tools that are capable of milling, drilling, tapping, reaming and routing.

The company's machines are generally computer controlled and use commands from an integrated computer to control the movement of cutting tools, grinding wheels, part positioning, and in the case of turning and grinding machines, the rotation speeds of the part being shaped. The machines are able to produce parts while left unattended when connected to automatic bar-feeding, robotics equipment, or other material handling devices designed to supply raw materials and remove machined parts from the machine.

The company produces machines for stock with various option combinations for immediate delivery, as well as designs and produces machines to specific customer requirements. In addition to its machines, the company provides the necessary tooling, accessories, and support services to assist customers. In addition, it offers a line of workholding, toolholding, and other industrial support products, which may be used on both its machines and those produced by others.

Sales, Markets, and Distribution

The company sells its products through a combination of distributors, agents and manufacturers' representatives in United States, China, Germany, and the United Kingdom. It sells its products to small and medium-sized independent job shops, which in turn sell machined parts to their industrial customers. Industries directly and indirectly served by it include aerospace, automotive, computer, communications, consumer-electronics, construction equipment, defense, energy, farm equipment, medical equipment, recreational equipment, and transportation.

Suppliers

The company's suppliers include Fanuc Limited, a Japanese electronics company and Heidenhain, a German control supplier.

Competition

For its high precision, multi-tasking turning and milling equipment, the company competes with companies, such as Mori-Seiki, Mazak, Nakamura Tome, and Okuma, which are based in Japan; and DMG, which is based in Germany. In its standard turning and milling equipment, the company competes with Hyundai-Kia and Doosan, which are

based in South Korea; and Haas which is based in the U.S.

The company's cylindrical grinding machines compete primarily with Studer, a Swiss Company; Voumard, also based in Switzerland; and Toyoda and Shigiya, which are based in Japan. Its Hauser jig grinding machines compete primarily with Moore, which is based in the U.S.

History

Hardinge Inc. was founded in 1890.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
