About Harford Bank

Harford Bank engages in general commercial and retail banking business serving individuals, businesses, and governmental units in Harford County, Maryland and neighboring counties. It operates six banking offices in Harford County, Maryland, and one branch office in Cecil County, Maryland, with the Bank's main office located in Aberdeen, Maryland.

Deposits and Related services

The Bank offers deposit services customary for a state-chartered community bank, including checking accounts, NOW accounts, savings accounts, and other time deposits of various types ranging from money market accounts to longer-term certificates of deposit. It also offers Individual Retirement Accounts. The Bank solicits these accounts from individuals, businesses, associations and organizations, and governmental authorities.

The Bank's other banking services include on-line banking with bill payment, cash management services, safe deposit boxes, direct deposit of payroll and social security checks, and ACH origination. It is associated with STAR Money Pass networks of automated teller machines that may be used by Bank customers throughout Maryland and other regions. It also offers Visa check (debit) card.

Lending Activities

The Bank offers a range of short to medium term commercial and personal loans. Commercial loans include both secured and unsecured loans for working capital, business expansion and purchase of equipment and machinery. Consumer loans include secured and unsecured loans, for financing automobiles, boats, mobile homes, education, bill consolidation, and home improvements. It also originates mortgage loans, real estate construction loans, and real estate acquisition loans.

The Bank's loan portfolio includes commercial loans, financial loans, agricultural loans, real estate construction and land development, real estate secured by farmland, real estate residential, real estate commercial, and consumer loans.

Investment Portfolio

The Bank's investment portfolio includes its investment in U.S. treasury and Government agency securities, state and municipal securities, and Federal Home Loan Bank stock.

History

Harford Bank was founded in 1964 as Aberdeen National Bank. It changed its name to Harford National Bank in 1980 and to Harford Bank in 2001.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
