Abstracts

Harris Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Harris Corp. and its competitors. This provides our Clients with a clear understanding of Harris Corp. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Harris Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Harris Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Harris Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Harris Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Harris Corp. business.

About Harris Corp.

Harris Corporation, together with its subsidiaries, operates as a communications and information technology company that serves government and commercial markets worldwide.

Segments

The company operates through three segments, including RF Communications, Government Communications Systems, and Broadcast Communications.

RF COMMUNICATIONS

RF Communications supplies tactical radio communications and embedded high-grade encryption solutions for military and government organizations and also of secure communications systems and equipment for public safety, utility, and transportation markets. RF Communications comprises its Tactical Radio Communications and Public Safety and Professional Communications businesses.

Tactical Radio Communications: The company designs, develops, and manufactures a line of secure radio communications products and systems for manpack, handheld, soldier-worn, vehicular, strategic fixed-site and shipboard applications that operate in

various radio frequency bands — high-frequency (HF), very high-frequency (VHF), and ultra high-frequency (UHF) — over satellite communications (SATCOM) and in multiband mode.

The company's Falcon family of tactical radios is built on a software-defined radio platform that is reprogrammable to add features or software upgrades.

The company's Falcon III family of radios supports the U.S. military's Joint Tactical Radio System (JTRS) requirements, as well as network-centric operations worldwide. The Falcon III radios address the range of mission and interoperability requirements and are upgradeable to address changing technical standards and mission requirements of the future.

The company's Falcon III multiband handheld radio, the AN/PRC-152 (152C), offers users a range of capabilities, such as legacy Single Channel Ground and Airborne System (SINCGARS) interoperability; UHF ground-to-ground line-of-sight communications; close-air support; tactical SATCOM; and the Association of Public Safety Communications Officials — International (APCO) P25 waveform to provide direct communications with first responders. The 152C also serves as the handheld-based transceiver of its Falcon III AN/VRC-110, a multiband vehicular system.

The company's new Falcon III multiband manpack radio, the AN/PRC-117G (117G), has been deployed to various branches of the DoD and is enabling the transition to a networked battlefield communications environment. The 117G runs its Advanced Networking Wideband Waveform (ANW2). The 117G includes a remote operated video enhanced receiver (ROVER) interoperable mode that provides warfighters on the battlefield with the ability to receive live video directly from unmanned aerial vehicles (UAVs).

The company's cryptographic solutions encompass products and systems that range from single integrated circuits to communications systems, including its Sierra and Citadel embedded encryption solutions and its SecNet 11 and SecNet 54 IP communications families of communications security (COMSEC) terminals.

In the international market, its tactical radios are the standard of NATO and Partnership for Peace countries and are sold to approximately 100 countries through its international distribution channels consisting of regional sales offices and a dealer network. In 2009, the company received tactical radio orders from, and/or made deliveries to, a range of international customers, including Australia, Ethiopia, Iraq, Mexico, Pakistan, Saudi

Arabia, Sweden and Yemen, as well as other countries in the Middle East and Central Asia. Additionally, it provides integrated communications systems for the international market.

The company's integrated systems offerings are based on its products, but include other companies' products, as well as various applications, to implement integrated command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) systems for different types of platforms, including command post and transit case systems, vehicular and shelter communications systems, and specialized airborne applications, which are frequently used in border security and surveillance systems.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
