- In the part that describes Hasco Medical, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hasco Medical, Inc. business.

About Hasco Medical, Inc.

Hasco Medical, Inc. offers home health care services and products consisting primarily of the rental and sale of home medical equipment and home health care supplies in Alabama, Florida, and Mississippi.

Services and Products

The company has two major service lines: home respiratory equipment and durable/ home medical

equipment.

Home Medical Equipment and Medical Supplies

The company provides equipment and supplies to serve the needs of home care patients. It sells and rents wheelchairs, power chairs, hospital beds, ambulatory aids, bathroom aids and safety equipment, and rehabilitation equipment.

Home Respiratory Equipment

The company provides home respiratory equipment primarily to patients with severe and chronic pulmonary diseases. It offers oxygen systems, obstructive sleep apnea equipment, and nebulizers.

Oxygen Systems: Oxygen systems assist patients with breathing. There are two types of oxygen systems: oxygen concentrators, which are stationary units that filter ordinary room air to provide a continuous flow of oxygen; and high pressure oxygen cylinders, which are used primarily for portability as an adjunct to oxygen concentrators. Oxygen systems are prescribed by physicians for patients with chronic obstructive pulmonary disease, cystic fibrosis, and neurologically-related respiratory problems.

Nebulizers: Nebulizers assist patients with breathing. Nebulizer compressors are used to administer aerosolized medications (such as albuterol) to patients with asthma, bronchitis, chronic obstructive pulmonary disease, and cystic fibrosis.

Respiratory Assist: Respiratory assist devices are used to force air through respiratory passage-ways during sleep. These treatments, which utilize continuous positive airway pressure (CPAP) or bi-level positive airway pressure therapy, are used on adults with obstructive sleep apnea (OSA), a condition in which a patient's normal breathing patterns are disturbed during sleep.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
