The Hathor Exploration Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Hathor Exploration Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hathor Exploration Ltd. business.

About Hathor Exploration Ltd.

Hathor Exploration Limited, a development stage company, engages in the acquisition, exploration, and development of mineral properties in western Canada. The company primarily focuses on uranium exploration in the Athabasca Basin region of Saskatchewan and Alberta.

Properties

Athabasca Basin Area, Saskatchewan and Alberta - Uranium Projects

Midwest NorthEast Project: The Midwest NorthEast property, located in the Athabasca basin of northern Saskatchewan, is 90% owned by the company. The target for exploration on the Midwest NorthEast property is an open-pit, high-grade, unconformity-style uranium deposit.

Henday Lake Project: In February 2009, the company has entered into an option agreement on Forum Uranium Corp.'s Henday project in the Athabasca Basin, Saskatchewan. The company can earn up to a 60% interest in the project.

Russell Lake Project: The company has a 40% interest in the 45,742 hectare Russell

Lake property.

South Russell Project: The South Russell property consists of two claims that are 100% owned by the company, and six claims that are 90% owned by it, with the balance held by Terra Ventures Inc.

Hatchet Lake and North Hatchet Projects: The 100%-owned Hatchet Lake and North Hatchet projects are located approximately 50 kilometers to the north-northeast of Cameco's basement-hosted Eagle Point Mine.

Vedette Lake Project: The company has a 100% interest in one exploration permit located approximately 120 kilometers southwest of AREVA Resources Canada Inc. (AREVA) and Cameco's Key Lake uranium processing facility and former-producing mine.

Milliken Creek Project: The company's 100% owned Milliken Creek property consists of one claim totaling 3,995 hectares (9,872 acres) that is located approximately 26 kilometers south-southeast from an uranium mine development project.

Old Fort Bay Project: The company holds a 25% interest in a joint venture with Triex Minerals Corporation (operator) on permits covering 87,040 hectare (215,081 acres) of the Athabasca Basin in Alberta.

Carswell Project: The Carswell Project is a joint venture with ESO Uranium Corp. (ESO) on claims that border AREVA's past-producing Cluff Lake mine in the western Athabasca Basin. ESO has earned a 50% interest in the project.

Wollaston NorthEast Project: The company has a 49% interest in the Wollaston NE property; a joint venture project with Triex Minerals Corporation (operator). This project covers 15,173 hectares.

Haultain River Project: The company and Forum Uranium Corp. each have a 50% interest in the Haultain River joint venture, with Forum as the operator. The project area is located approximately 90 kilometers southwest of the Key Lake uranium mill complex of AREVA and Cameco.

Hornby Bay Uranium Project, Northwest Territories

The company has a 100% interest in the Hornby Bay uranium property in Northwest

Territories.

Eskay Properties, British Columbia - Base and Precious Metals

The company considers its 100% owned Eskay Creek Claims, the Globe Claims, and the Quill Property Claims to form what is referred to as the 'Eskay Properties'. The company's Eskay claims cover approximately 300,000 acres, which consist of approximately 20 projects at varying stages of development. The Eskay Properties also include Copperline Property. The Quill and Globe properties are located in the Skeena Mining Division, British Columbia. The Copperline property is located in the Omineca Mining Division, British Columbia.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
