Abstracts

Haynes International Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Haynes International Inc. and its competitors. This provides our Clients with a clear understanding of Haynes International Inc. position in the [Metals and Mining](#) Industry.

The report contains detailed information about Haynes International Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Haynes International Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Haynes International Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Haynes International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Haynes International Inc. business.

About Haynes International Inc.

Haynes International, Inc. engages in the development, manufacture, marketing, and distribution of alloys primarily for use in the aerospace, chemical processing, and land-based gas turbine industries.

The company's products consist of high temperature resistant alloys, or HTA products, and corrosion resistant alloys, or CRA products. HTA products are used by manufacturers of equipment that is subjected to high temperatures, such as jet engines for the aerospace market, gas turbine engines used for power generation and waste incineration, and industrial heating equipment. It also produces its products as seamless and welded tubulars, and in slab, bar, billet, and wire forms.

High Temperature Resistant Alloys (HTA): HTA products are used primarily in manufacturing components for the hot sections of gas turbine engines. HTA products are also used in gas turbine engines produced for use in applications, such as naval and commercial vessels, electric power generators, power sources for offshore drilling platforms, gas pipeline booster stations, and emergency standby power stations.

Corrosion Resistant Alloys: CRA products are used in various applications, such as chemical processing, power plant emissions control, hazardous waste treatment, sour

gas production and pharmaceutical vessels.

End Markets

Aerospace: The company has manufactured HTA products for the aerospace market and has developed proprietary alloys for this market.

Chemical Processing: The chemical processing market represents a base of customers with CRA applications driven by demand for key end use industries, such as automobiles, housing, health care, agriculture, and metals production.

Land-based Gas Turbines: Demand for the company's products in this market is driven by the construction of cogeneration facilities, such as base load for electric utilities or as backup sources to fossil fuel-fired utilities during times of peak demand. Demand for the company's alloys in the land based gas turbine industry has also been driven by concerns regarding lowering emissions from generating facilities powered by fossil fuels.

Other Markets: Other industries to which the company sells its HTA products and CRA products include flue gas desulphurization (FGD), oil and gas, waste incineration, industrial heat treating, automotive, instrumentation, biopharmaceuticals, solar and nuclear fuel. The company also sells its products for use in the oil and gas industry, primarily in connection with sour gas production.

Sales

The company sells its products primarily through its direct sales organization, which operates from 14 total locations in the U.S., Europe, Asia, and India, 11 of which are service and/or sales centers.

Competition

The company's primary competitors in flat rolled products include Special Metals Corporation, a subsidiary of Precision Cast Parts, Allegheny Technologies, Inc., and Krupp VDM GmbH, a subsidiary of Thyssen Krupp Stainless.

History

Haynes International, Inc. was founded in 1912.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
