Abstracts

Helix Biomedix Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Helix Biomedix Inc. and its competitors. This provides our Clients with a clear understanding of Helix Biomedix Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Helix Biomedix Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Helix Biomedix Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Helix Biomedix Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Helix Biomedix Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Helix Biomedix Inc. business.

About Helix Biomedix Inc.

Helix BioMedix, Inc., a biopharmaceutical company, engages in developing and commercializing bioactive peptides and patents covering various peptide sequences. The company has a proprietary library containing an array of natural and synthetic bioactive peptides.

Products

The company has developed short, small-chain peptides with anti-infective and anti-inflammatory properties, such as the stimulation of cell proliferation and migration. It has developed various peptides with sequences in the following two areas of application:

Consumer Skin Care Products: The company has developed a range of peptides, which improves different aspects of the skin's appearance, texture, tone, and barrier function and are marketing these peptides as ingredients for cosmetic use.

Prescription (Rx) Products: The company's peptides have applications in the areas of infection control, wound healing, and immune modulation and are being developed for Rx applications.

Consumer Skin Care Products

Anti-Acne: The company's peptide may be formulated into products with certain over-the-counter anti-acne ingredients for improvement in blemish-clearing offerings.

Anti-Aging: The company has identified and qualified various peptides that target changes in the appearance of skin associated with the aging process. Peptides that target improvement in the appearance of aging skin would affect one or more of the age-related skin characteristics: lines and wrinkles, loss of elasticity, loss of firmness and definition, appearance of darkened areas or general unevenness of skin tone, rough texture, and thinning of the skin. The company's main anti-aging peptide targets various aspects of support for the skin's structural matrix. It has entered into a license agreement with Goldschmidt GmbH, a wholly owned subsidiary of Evonik GmbH, a supplier of cosmetic ingredients. The agreement provides rights to certain of its peptides targeted towards skin care and personal care applications. The peptide opportunities for its anti-aging portfolio include a group of synthetic peptides that are branded as Modukines.

Branded Products: The company launched its proprietary skin care products under the Striking brand. The product line, formulated to address perimenopausal and menopausal challenged skin, introduced the Helix BioMedix SmartPeptide Heptapeptide-7 technology that helps nourish keratinocytes to support skin renewal. Targeted at the health and beauty consumer market, the Striking Skin Care line features a ritual of daily essentials including Multi-Vitamin Creme Cleanser, Multi-Peptide Serum, Rejuvenating Eye Crème, and Restorative Moisture Creme. The products are distributed through its e-commerce Web site at www.striking skincare.com, as well as through spas and select catalogue and Internet retailers.

Rx Programs

The company is developing a topical anti-infective for the treatment of skin and wound infections and the prevention of Staphylococcus aureus (S. aureus) infections, including those caused by Methicillin resistant Staphylococcus aureus (MRSA). These programs are based upon a family of molecules known as lipohexapeptides (or small molecule peptides) that it developed to specifically combine the attributes of small molecule natural products with the antimicrobial peptides. This new class of anti-infective peptides has demonstrated improvement in activity, both in vitro and in vivo, over traditional antimicrobial peptides. In pre-clinical testing, the company's molecules exhibited antimicrobial activity against bacterial pathogens, such as S. aureus,

Streptococcus pyogenes, and Pseudomonas aeruginosa, and also pathogenic fungi, such as Candida and Trichophyton species. The company's Rx product development efforts are currently focused on the following:

Acne Anti-Infective: The company's lipohexapeptide program is directed at developing small, stable, and potent antimicrobial peptides, which deliver therapeutic benefit within the clinical environment. These molecules overcome the challenges typically associated with acne, such as the ability to work in an oil and serum environment and the ability to kill organisms deep within a pore. Its lipohexapeptide offers benefits in anti-inflammatory activity in addition to antimicrobial activities.

Topical Fungal Infections: Trichophyton species are the cause of various fungal skin infections, including athlete's foot, tinea capitis (scalp ringworm), and onychomycosis (nail fungus). The company's molecules treat Trichophyton infections and multiple dermatological indications.

History

Helix BioMedix, Inc. was founded in 1988.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
