The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hochtief AG business.

About Hochtief AG

Hochtief AG provides construction services. The company offers a portfolio encompassing development, building and construction related services to concessions and operating services.

The company plans and develops projects ranging from office blocks and shopping malls to sports arenas, airports, and corporate locations. The Company designs, finances, builds, and operates complex projects.

The Company provides a package of services covering the entire construction-planning phase ranging from obtaining planning permission and building permits to drawing up detailed construction site logistical plans. It also develops, implements, and markets realty and infrastructure projects in Germany and all over the world.

The Company offers its clients a wealth of preconstruction services, including complete construction planning, which encompasses everything from obtaining permits to working out a detailed strategy for construction site logistics. The Company is working constantly on identifying and picking up international trends at an early stage.

The Company provides a central budget for Research and Development Projects (R&D Projects) of cross-divisional significance. These innovation projects are planned and

carried out by a HOCHTIEF corporate unit. Corporate Center Corporate Development in the HOCHTIEF Holding coordinates and controls these activities and ensures the know-how transfer throughout the Group. It is also responsible for the central R&D budget.

Development

The company develops top-notch commercial properties in Germany and a number of other countries. In all of these instances, the project's foundation is laid long before construction begins; it starts with an idea.

The company's Projektentwicklung, develops custom properties for anchor tenants and then places them with end investors. Office and hotel properties in and near downtown areas are the focus.

Financing

The company develops and optimizes finance packages that are coordinated with investors and partners in banking from around the globe. Its financial service teams also advise and assist subsidiaries and associated companies as they conduct negotiations throughout the world, offering support that extends from the initial planning stages all the way to contract signing.

Construction

The sustainable construction segment encompasses the design, building and operation of environmentally sound and energy saving structures.

With Medcube, the company Construction has developed a holistic concept in medical care. Medcube offers physicians from a variety of disciplines of offices in the immediate vicinity of municipal hospitals. The close cooperation of physicians coupled with the proximity of Medcube buildings to hospitals would make it possible to coordinate diagnostic and therapeutic strategies and implement them as part of an integrated healthcare concept.

Services

Preconstruction services

The company offers its clients a wealth of preconstruction services, including complete

construction planning, which encompasses everything from obtaining permits to working out a detailed strategy for construction site logistics.

Concessions and operation

The company's concessions and operation offering grew out of the core construction business and includes concessions and holdings, the public-private partnership (PPP) model with a focus on operator-run properties. The key market segments are public buildings/social infrastructure, toll roads/transportation, including bridges and tunnels, as well as airport holdings and operation-focused contract mining. It conducts business in this market through a host of companies, including HOCHTIEF PPP Solutions and Aecon (Europe and America), Leighton and Concor (Australia, Asia-Pacific, southern Africa) and HOCHTIEF AirPort (airport holdings).

Mining operation by HOCHTIEF: The company's subsidiary Leighton is a contractor for numerous mines in Australia and Asia. Contract mining is the logical, technological consequence of decades of experience doing major excavations for traditional civil engineering projects. Its operation includes services before, during and after the excavation of raw materials like coal, iron ore, gold, nickel and zinc. Leighton also offers extraction preparations.

Significant Events

Qatari Diar Real Estate Investment Co. has signed an agreement with Hochtief AG to establish a service joint venture. The joint venture would establish a close partnership in service delivery to include construction. The official signing took place in Doha on Sunday with Qatari Diar's CEO Ghanim Bin Saad Al-Saad and Hochtief's representatives Henner Mahlstedt, Eimert Los and Wilhelm Bruns. The immediate focus would be to create a construction joint venture between Qatari Diar and Hochtief focusing on related construction services including knowledge exchange, project management and best practice.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
