Abstracts

Hologic Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Hologic Inc. and its competitors. This provides our Clients with a clear understanding of Hologic Inc. position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about Hologic Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Hologic Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Hologic Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Hologic Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hologic Inc. business.

About Hologic Inc.

Hologic, Inc. engages in the development, manufacture, and supply of diagnostics, medical imaging systems and surgical products focused on the healthcare needs of women.

Segments

The company operates in four segments, such as Breast Health, Diagnostics, GYN Surgical, and Skeletal Health.

Breast Health Products

This segment offers a portfolio of breast imaging and related products and accessories, including digital and film-based mammography systems, magnetic resonance imaging (MRI) breast coils, computer-aided detection (CAD) for MRI, minimally invasive breast biopsy devices, breast biopsy site markers, breast biopsy guidance systems, breast imaging comfort pads, and breast brachytherapy products. It developed a new breast imaging platform, Dimensions, which utilizes a new technology, tomosynthesis, to produce 3D images. In 2009, the company's breast health segment also included the sale of digital detectors to an original equipment manufacturer, and its organic photoconductor coating business in Shanghai, China.

Selenia Full Field Digital Mammography System: The Selenia full field digital mammography system is based on its proprietary, amorphous selenium DirectRay digital detector, which preserves image quality by using amorphous selenium to directly convert x-rays to electronic signals.

Breast Tomosynthesis: The company's Dimensions platform includes a mammography gantry capable of performing both two dimensional (2D) and three dimensional (3D) image acquisition and display. The images are mathematically processed into a series of small slices, revealing breast tissue from a 3D perspective.

Screen-Film Mammography Systems: The company's screen-film mammography systems include its LORAD M-IV and M-IV Platinum systems.

SecurView Workstation: The images captured by digital mammography systems are transmitted electronically for review by a radiologist at a work station. To complement this product, the company also developed the SecurViewRT workstation, a technologist workstation enabling bi-directional exchange of electronic communications between the reviewer and the technologist.

CAD Systems: The company has developed CAD software tools for its mammography and MRI products. The company has integrated its mammography applications CAD software tools into its line of multi-modality breast imaging workstations.

Stereotactic Breast Biopsy Systems: The company provides clinicians with the use of choosing upright or prone systems for breast biopsy by offering two minimally invasive stereotactic breast biopsy guidance systems, the MultiCare Platinum dedicated, prone breast biopsy table and the StereoLoc II upright attachment. The StereoLoc II attachment is used in conjunction with its M-IV series of screen-film mammography systems and its Selenia full field digital mammography systems. These breast biopsy systems provide an alternative to open surgical biopsy, and can be performed as an outpatient procedure under local anesthesia, allowing shorter recovery times.

Breast Biopsy Products: The company offers minimally invasive interventional products for breast biopsy and site marking. Its Automated Tissue Excision and Collection (ATEC) product line includes percutaneous, automatic vacuum-assisted breast biopsy collection systems, a disposable device used to collect samples, and biopsy site markers. The ATEC line of products is designed to accommodate a range of clinical and patient presentations. Its Celero product is a vacuum-assisted, spring-loaded, large-

core biopsy device designed for use under ultrasound guidance to access hard-to-reach lesions in the axilla, near the chest wall, near implants or behind the nipple.

Breast Brachytherapy Products: The MammoSite Radiation Therapy System is a breast brachytherapy technology that offers accelerated partial breast irradiation (APBI) therapy to treat breast cancer. It offers multi-lumen device and the MammoSite ML radiation therapy system. The MammoSite ML system allows radiation oncologists to shape the radiation dose for typical cases and treat patients who are otherwise not appropriate candidates for traditional brachytherapy. The MammoSite ML d

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
