The Home Director, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Home Director, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Home Director, Inc. business.

### **About Home Director, Inc.**

Home Director, Inc. engages in the design, manufacture and sale of home networking and entertainment solutions that can interconnect security systems, audio systems, video services, televisions, utilities, personal computers and the Internet. The company's products have been sold to approximately 60,000 home owners in the United States and Canada.

The company's home networking solutions are intended to function as the electronic foundation for linked access to third-party services and technologies, including those that are available and those that may be offered in the future. Within a 'connected' or 'networked' home, the company's proprietary Network Connection Center can be used to interconnect various devices, appliances or gateways so they can be centrally controlled. With a Home Director system, a home owner can listen to music from speakers throughout the home, play different music in different areas of the home, view and manage digital photographs on television, network computers within the home, remotely view other areas of the home, change or reconfigure telecommunications options within the home, and perform a variety of other automated functions.

### **Products and Services**

The company's home networking solution consists of structured wiring and proprietary hardware and software. This solution is based on its proprietary communications device, called the Network Connection Center. The Network Connection Center is a hardware installation offered in several configurations which houses structured wiring terminals and, in conjunction with applications software, connects and coordinates all of the networked applications and devices within the home. The structured wiring infrastructure can be scaled to high or low capacity levels in accordance with specific builder or consumer requirements. The Network Connection Center can support a variety of hardware and software products.

### Acquisitions

The company, as of December 28, 2006, acquired substantially all the assets and assumed certain liabilities of Destiny Networks, Inc.

The company's wholly-owned subsidiary, Home Director Acquisition Corporation, as of March 7, 2007, acquired substantially all the assets and assumed certain liabilities of Novus Technologies, Inc.

### Customers

The company's products are marketed primarily for installation in new homes. Customers for its home networking systems include home builders and developers in the United States, including KB Homes, Richmond America, DR Horton, Lennar and Arvida.

### Target Market

The new home construction industry offers the principal market for Home Director's products and services.

### Competition

The company, in the production and marketing of hardware for networking installations, competes with LeGrand, Leviton, Honeywell and GE.

### History

Home Director, Inc. was founded in 1999.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
