Abstracts

Homeland Security Capital Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Homeland Security Capital Corporation and its competitors. This provides our Clients with a clear understanding of Homeland Security Capital Corporation position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Homeland Security Capital Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Homeland Security Capital Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Homeland Security Capital Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Homeland Security Capital Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Homeland Security Capital Corporation business.

About Homeland Security Capital Corporation

Homeland Security Capital Corporation provides technology-based radiological, nuclear, environmental, and disaster relief electronic security solutions to government and commercial customers. The company engages in the acquisition, operation, development, and consolidation of companies operating in the chemical, biological, radiological, nuclear, and explosive (CBRNE) incident response and security marketplace within the fragmented homeland security industry.

Platform Companies

The company conducts its operations through one wholly owned subsidiary, Safety & Ecology Holdings Corporation (SEC); one majority-owned subsidiary, Nexus Technologies Group, Inc. (Nexus); and one joint venture, Polimatrix, Inc. (PMX).

SAFETY & ECOLOGY HOLDINGS CORPORATION

SEC provides global environmental, hazardous, and radiological infrastructure remediation and advanced construction services in the United States and the United

Kingdom. SEC's main core business areas and service offerings include remediation, decommissioning and demolition (D&D), environmental/remedial construction and construction project management; environmental services; environmental technologies; and CBRNE incident response and prevention and consequence management, as well as catastrophic natural disasters response.

SEC's domain knowledge is defined within four primary business areas: Remediation and D&D, Remedial Construction and Construction Management; Environmental Services; Environmental Technologies; and CBRNE Response and Prevention.

Remediation and D&D, Remedial Construction and Construction Management: SEC is a licensed general contractor for building/facility construction offering services for government and commercial clients. SEC offers a range of construction services that include site preparation, excavation, and remedial system construction; underground and overhead utility installation; electrical and mechanical installation; security fencing and device installation and upgrades; building renovation; piping; roadways, parking lots, and drainage system construction/repair; and landfill remediation and capping. SEC also engages in facility deactivation, demolition and closure solutions, including project investigation; radiological pre-engineering; demolition planning; removing above ground structures and structural components; storing, testing, certifying, processing and shipping nuclear waste; and abatement of hazardous materials.

Environmental Services: SEC provides environmental consulting and staff services. SEC focuses its service offering on the application and integration of health physics, industrial hygiene, hazardous material consultancy, and safety and health. In addition, SEC couples its technology with its instrumentation offering, on-site radiological laboratory capabilities, mobile radiological materials license, and a team of approximately 250 certified health physicists (CHP), certified industrial hygienists (CIH) engineers, and radiological technicians to provide radiological services and consultation.

Environmental Technologies: The company delivers project execution services to clients under firm-fixed price contracts. It offers its portfolio of technologies to clients as a direct service, a sub-element of project services or as a component of a technical solution. The primary elements of SEC's technology offering are instrumentation services and instrumentation technology, both of which are targeted to field investigations, characterizations of contaminants and clean-up and material management solutions.

CBRNE Response: SEC offers services, products, and solutions for emergency

response to chemical, biological, radiological, nuclear, and explosive incidents, as well as catastrophic natural disasters.

SEC addresses the needs of both government and commercial customers as a single source provider for technology-based nuclear services, including engineering, D&D, specialty construction, logistics, transportation, processing, and disposal. Domestically, SEC provides government and commercial organizations the ability to safely execute radiological and hazardous material projects.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
