The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of HQ Global Education Inc. business.

About HQ Global Education Inc.

HQ Global Education Inc. provides vocational education and vocational training services to a varied student population throughout China.

Operations

The company offers a range of educational programs and services through vocational schools, consisting primarily of 'customized education' programs for various vocational skills and school logistic services under the 'HQ' brand. As of August 31, 2010, it delivered its education programs and services to students through a network of 10 schools, 5 of which were in Hunan province, 4 were in Sichuan province, and 1 was in Shanxi province. It had approximately 100,150 student enrollments. Its prospective students include graduates from junior secondary schools, high schools and colleges, unemployed people, and the rural labor force.

The company operates four private secondary vocational schools (Changsha Huanqiu, Shaoshan Huanqiu, New HQ Technical, and Tianzhen Huanqiu) and a public secondary vocational school (Shaoshan Vocational School) in China through Hunan Oya Education Technology Co., Ltd. Through Changsha Huanqiu, it operates five public secondary vocational schools, Yingjing Vocational School, Tianquan Vocational School,

Shimian Vocational School, Lushan Vocational School, and Shaoyang Vocational School.

The company's offerings primarily consist of various levels and types of vocational training programs for graduates from junior secondary schools, high schools and colleges, unemployed people, and rural labor force, customized pursuant to the need and requirement of its cooperating enterprises. As of August 31, 2010, the company had the following 17 categories of programs available for enrollment: mould design and manufacture; numerical control technology; computer and computer application; computer information management; computer software engineering; computer-aided design; computer repair and maintenance; computer network engineering; apparel design and technique; electronic commerce; accounting; tour and hotel management; secretary; electronic technology application; electronic and electrical; international trade; and electromechanical integration. These 17 categories include approximately 60 programs.

Competition

The company faces nationwide competition for its computer courses from Xinhua Computer School. It faces regional competition for its computer, electronic technique, and apparel-making programs from various competitors, such as Shandong Lanxiang Senior Technology School.

History

HQ Global Education Inc. was founded in 1994.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
