Abstracts

Hubbell Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Hubbell Inc. and its competitors. This provides our Clients with a clear understanding of Hubbell Inc. position in the [Electrical Equipment](#) Industry.

The report contains detailed information about Hubbell Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Hubbell Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Hubbell Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Hubbell Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hubbell Inc. business.

About Hubbell Inc.

Hubbell Incorporated engages in the design, manufacture, and sale of electrical and electronic products for a range of non-residential and residential construction, industrial, and utility applications.

The company operates, through its subsidiaries, in the United States, Canada, Switzerland, Puerto Rico, Mexico, the People's Republic of China, Italy, the United Kingdom, Brazil, and Australia. It also participates in joint ventures in Taiwan and the People's Republic of China, and maintains sales offices in Singapore, the People's Republic of China, Mexico, South Korea, and the Middle East.

In October 2009, the company acquired Burndy Americas (Burndy), a North American manufacturer of connectors, cable accessories, and tooling. Burndy's connector portfolio consists of Hydent and Servit compression and mechanical connectors; Implo, Hyground, and Burndyweld transmission and substation grounding connectors and Wejtap overhead line connectors. Burndy also sells cable accessories, including Penetrox oxide inhibiting compounds and hydraulic, pneumatic, and mechanical tooling, including the Patriot family of battery tools and The Smart Cart cable management systems. Burndy serves commercial and industrial markets and utility customers primarily in the United States.

Segments

The company conducts its operations through two business segments, including the Electrical segment (consisted of electrical systems products and lighting products) and the Power segment.

ELECTRICAL SEGMENT

The Electrical segment comprises businesses that sell stock and custom products, including standard and special application wiring device products, rough-in electrical products and lighting fixtures and controls, and other electrical equipment. The products are typically used in and around industrial, commercial and institutional facilities by electrical contractors, maintenance personnel, electricians, and telecommunications companies. In addition, certain businesses design and manufacture various high voltage test and measurement equipment, industrial controls and communication systems used in the non-residential and industrial markets.

These products are primarily sold through electrical and industrial distributors, home centers, some retail and hardware outlets, and lighting showrooms. Special application products are sold primarily through wholesale distributors to contractors, industrial customers and original equipment manufacturers (OEMs). High voltage products are sold primarily by direct sales to customers through its sales engineers. Hubbell maintains a sales and marketing organization to assist potential users with the application of certain products to their specific requirements, and with architects, engineers, industrial designers, OEMs and electrical contractors for the design of electrical systems to meet the specific requirements of industrial, non-residential and residential users. Hubbell is also represented by sales agents for its lighting fixtures and controls, electrical wiring devices, rough-in electrical products and high voltage products lines.

Hubbell Electrical Systems

Wiring Products

Hubbell designs, manufactures, and sells wiring products which are supplied principally to industrial, non-residential and residential customers. These products, comprising thousand catalog items, include items such as: Cable/cord reels; Connectors; Floor boxes/poke throughs; Ground fault devices; Marine products; Mesh grips; Pin & sleeve devices; Service poles; Surge suppression devices; Switches & dimmers; Switched

enclosures; and Wiring accessories. These products are sold to industrial, non-residential, utility, and residential markets. Hubbell also manufactures TVSS (transient voltage surge suppression) devices, which are designed to protect electronic equipment, such as personal computers and other supersensitive electronic equipment. Hubbell also manufactures and/or sells components designed for use in local and wide area networks and other telecommunications applications supporting high-speed data and voice signals.

Electrical Products

Hubbell designs and manufactures electrical products with various ap

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
