## Abstracts

Hutchinson Technology Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Hutchinson Technology Inc. and its competitors. This provides our Clients with a clear understanding of Hutchinson Technology Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Hutchinson Technology Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Hutchinson Technology Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Hutchinson Technology Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Hutchinson Technology Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hutchinson Technology Inc. business.

### **About Hutchinson Technology Inc.**

Hutchinson Technology Incorporated engages in the design, development, manufacture, and marketing of suspension assemblies for disk drives.

#### Segments

The company operates in two segments, Disk Drive Components and BioMeasurement.

#### **DISK DRIVE COMPONENTS DIVISION**

The Disk Drive Components segment manufactures suspension assemblies for various sizes and types of hard disk drives. Suspension assemblies are critical components of disk drives that hold the read/write heads in position above the spinning magnetic disks.

#### Products

The company categorizes its products as either suspension assemblies or other products, which consist primarily of reimbursement for engineering services and specific program capacity.

Suspension Assemblies: During 2010, the company shipped 512 million suspension assemblies. The company shipped TSA, TSA+ and conventional suspension assemblies, as well as suspensions using purchased additive flexures, to its customers. It produces suspension assemblies using its 'additive' and its 'subtractive' manufacturing processes. The company's TSA+ suspensions are the plan of record on multiple customer programs.

### Customers and Marketing

The company sells its suspension assemblies to original equipment manufacturers for use in their products and to sub-assemblers who sell to original equipment manufacturers. It is a supplier to various manufacturers of disk drives and head-gimbal assemblers. Its major customers include Western Digital Corporation; SAE Magnetics, Ltd./TDK Corporation; Seagate Technology, LLC; Hitachi and affiliates; and Toshiba Corporation. Its major customers are located in Thailand, Hong Kong, and the Philippines.

### Competition

The company's principal competitors for suspension assemblies are Nihon Hatsujo Kabusikigaisha (NHK); Magnecomp Precision Technology Public Company Limited (MPT), a subsidiary of TDK Corporation; and NAT Peripheral (H.K.) Co., Ltd., (a joint venture of NHK and SAE Magnetics, Ltd./TDK Corporation). Its principal competitors in producing suspension flexures are Nitto Denko Corporation and Dai Nippon Corporation.

## BIOMEASUREMENT DIVISION

The BioMeasurement division focuses on bringing new technologies and products to the market that provide information clinicians can use to improve the quality of health care.

### Products

The company has designed the InSpectra StO<sub>2</sub> System for use in trauma, critical care, and emergency medicine settings where there is a need to directly monitor the compromised tissue perfusion associated with hemorrhagic and other forms of shock. The system consists of the InSpectra StO<sub>2</sub> Tissue Oxygenation Monitor and the InSpectra StO<sub>2</sub> Sensor. The device provides a measure of local tissue oxygen

saturation (StO<sub>2</sub>), which quantifies the ratio of oxygenated hemoglobin to total hemoglobin in the microcirculation of skeletal or peripheral muscle. This measurement helps clinicians instantly assess and detect changes in the patient's overall perfusion status, enabling them to make treatment decisions in critical care settings.

The InSpectra StO<sub>2</sub> System uses a near infrared spectroscopy to provide a measurement of StO<sub>2</sub> in muscle tissue. The InSpectra StO<sub>2</sub> Tissue Oxygenation Monitor is configured for use with the single-use sensor, which is applied to the thenar eminence (the muscle at the base of the thumb on the palm side of the hand).

## Customers

The company's customers include major medical centers primarily in the United States and Europe.

## History

Hutchinson Technology Incorporated was founded in 1965.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
