About HXT holdings, Inc

HXT Holding, Inc. provides application software and system integration services in China. The company develops and produces industry-specific software and provides related systems-integration services. Its software products include housing accumulation fund software; credit guarantee software; and family planning software.

Housing Accumulation Fund Software

Housing Accumulation Fund software provides computerized information management solution for the national housing accumulation fund management system which involves four types of users: housing accumulation fund management centers, which are local government agencies that manage and administer the system; supervisors; designated commercial banks where the contributed funds are deposited and held; and the participating employees and employers, which include government offices, state-owned and private companies, for-profit and non-profit organizations that contribute to the funds.

The company offers four versions of its housing accumulation fund software—a 'center version', a 'supervisor version', a 'bank version' and a 'unit version'. Its versions is developed to serve the specific needs of the various groups of participants, allowing

them to create, manage, and analyze a database of information relating to housing accumulation funds, including employee information, deposits and withdrawals, individual loans, housing subsidies, housing purchases and sales, property records, and other information.

Credit Guarantee Software

The company's software provides a means of collecting and organizing data from small and medium enterprises and performs risk management functions, such as financial analysis, credit evaluation, and risk estimation.

Family Planning Software

The company develops family planning software for use by government family planning management departments, public education organizations, and nonprofit family planning associations. Its software provides functions, such as data collection, processing, statistical reporting, search engine capabilities, an 'early warning' system for monitoring rapid population increase and system maintenance. The system is used by different levels of government family planning management departments, public education organizations, and family planning associations.

Competition

Competition in the Housing Accumulation Fund Software Market: The company's competitors in housing accumulation fund software market include Beijing Jintianpeng Software Technology Co Ltd.; Beijing Zhongfangyuan Housing Reformation and Information Network Co Ltd.; and Xi'an Gildsoft Technology Development Co Ltd.

Competition in the Family Planning Software Market: The company's competitors in family planning software market include Shenzhen WanGuo Software; Shenzhen MaiKeLong; Luzhou HongSheng Technology; Luzhou Municipality; Guizhou XinTian PC; Zhengzhou YueTai Software; and Hunan JinQiao Software.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
