The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Hythiam Inc. business.

About Hythiam Inc.

Hythiam, Inc., a healthcare services management company, provides behavioral health management services for substance abuse to health plans, employers, and unions.

Segments

The company manages and reports its operations through two business segments: Behavioral Health and Healthcare Services.

Behavioral Health

The Behavioral Health segment includes Catasys and its integrated substance dependence solutions marketed to health plans, employers and unions through a network of licensed and company managed healthcare providers.

The company's Catasys integrated substance dependence solution combines medical and psychosocial treatments with elements of population health management and ongoing member support to help organizations treat and manage substance dependent populations. Its Catasys integrated substance dependence program includes the following components: member identification, enrollment/referral, provider network, outpatient medical treatment, outpatient psychosocial treatment, care coaching,

monitoring and reporting, and its proprietary Web based clinical information platform.

Healthcare Services

The Healthcare Services segment provides licensing, administrative and management services to licensees that administer PROMETA and other treatment programs, including a managed treatment center that is licensed and managed by the company. The company manages one treatment center located in Santa Monica, California (doing business as the Center to Overcome Addiction).

The company's PROMETA Treatment Program is an integrated, physician-based outpatient addiction treatment program that combines three components—medical treatment, nutritional support and psychosocial therapy—all critical in helping people address addiction to alcohol and stimulants (cocaine and methamphetamine).

The PROMETA Treatment Program, which integrates behavioral, nutritional and medical components, is also available on a private-pay basis through licensed treatment providers and a company managed treatment center that offers the PROMETA Treatment Program, as well as other treatments for substance dependencies. The PROMETA Treatment Program includes nutritional supplements, oral and IV medications used off-label, and separately administered in a dosing algorithm, as well as psychosocial or other recovery-oriented therapy chosen by the patient and treatment provider.

History

Hythiam, Inc. was founded in 2000.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
