Such information creates your awareness about principal trends of IBSG International, Inc. business.

About IBSG International, Inc.

IBSG International, Inc., through its subsidiaries, provides various software solutions and services.

The company's subsidiaries include Intelligent Business Systems Group, Inc. (IBSG), a provider of turn-key digital service center software; Secure Blue, a Sarbanes-Oxley (SOX) and security software solution provider; Intelligent Business Systems Development (IBSD), a software development, maintenance and data storage company; and IBSGI UK, LTD, a consultant company focused on development of IT projects for multi-national corporations.

IBSG offers BizWorld Pro, a copyrighted and trademarked e-commerce platform, as a solution to enhance the operating efficiency and create revenue for State Small Business Development Centers, business associations and Fortune 1000 corporations through the licensing of its digital service center software. This software provides a range of digital budgetary, administrative and commercial services (B2B, e-commerce, government to business and enterprise business services) on a single platform.

Secure Blue provides an economical SOX compliance and security software suite product called Secure Blue Pro. This product is targeted to small and mid cap public

companies as well as private companies that work with public companies that therefore must comply with SOX requirements.

IBSD, Inc. provides ongoing support for its other subsidiaries; IBS Group, Secure Blue, and IBSGI UK. The company provides development, system support and secure data storage, and maintains offices in both the United States and India, where its offshore development and support team is located.

IBSGI UK, LTD. (IBSGI UK), a United Kingdom based subsidiary, provides business development and support to IBSGI's international projects. IBSGI UK maintains relationships with various international government officials at the ministry/secretary level as well as international corporations' offset programs and provides IT projects for these corporations. IBSGI UK is engaged in international business development and consultancy in the Technology sector. IBSGI UK's participates in international e-commerce platform (BizWorld Pro, copyrighted and trade mark protected) projects for Small-Mid-sized Enterprises. The company's relationship with IBSGI UK has produced a project in South Africa along with opportunities for similar projects in Africa, Europe, and India.

Markets

The company sells its services and licenses its products through master licensee arrangements with state operated small business development centers, fortune 1000 corporations, government agencies, business associations, banking institutions, economic development projects, and international markets.

History

IBSG International, Inc. was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
