Such information creates your awareness about principal trends of Icahn Enterprises, L.P. business.

About Icahn Enterprises, L.P.

Icahn Enterprises L.P. operates as a diversified holding company. The company owns subsidiaries engaged in the following businesses: Investment Management, Automotive, Metals, Real Estate, and Home Fashion.

Investment Management

The Private Funds seek to acquire securities in companies that trade at a discount to inherent value as determined by various metrics including replacement cost, break-up value, cash flow and earnings power and liquidation value.

Automotive

The company has a majority interest in Federal-Mogul Corporation, or Federal-Mogul. Federal-Mogul is a supplier of powertrain and safety technologies, serving the original equipment manufacturers, or OEMs, of automotive, light commercial, heavy-duty, agricultural, marine, rail, off-road and industrial vehicles, as well as the worldwide aftermarket.

Mogul conducts its operations through various manufacturing, distribution, and technical

centers that are wholly owned subsidiaries or partially owned joint ventures, organized into four product groups: Powertrain Energy, Powertrain Sealing and Bearings, Vehicle Safety and Protection and Global Aftermarket. Federal-Mogul offers its customers an array of products for OEM, and replacement parts, or aftermarket, applications including pistons, piston rings, piston pins, cylinder liners, valve seats and guides ignition products, dynamic seals, bonded piston seals, combustion and exhaust gaskets, static gaskets and seals, rigid heat shields, engine bearings, industrial bearings, bushings and washers, transmission components, brake disc pads, brake linings, brake blocks, element resistant systems protection sleeving products, acoustic shielding, flexible heat shields, brake system components, chassis products, wipers, fuel pumps and lighting.

As of December 31, 2009, Federal-Mogul had OE products included on approximately 300 global vehicle platforms and approximately 700 global powertrains used in light, medium and heavy-duty vehicles.

Joint Ventures and Other Strategic Alliances: Federal-Mogul is involved in 32 joint ventures located in 13 different countries throughout the world, including China, India, Korea, Russia and Turkey.

Products: The following provides an overview of products manufactured and distributed by Federal-Mogul:

Powertrain Energy: Powertrain Energy products are used in automotive, light truck, heavy-duty, industrial, marine, agricultural, power generation, and small air-cooled engine applications. The primary products of this product group include pistons, piston rings, piston pins, cylinder liners, valve seats and guides, and ignition products.

Powertrain Sealing and Bearings: Federal-Mogul is one of the sealing solutions and bearings providers. Product offerings include dynamic seals, bonded piston seals, combustion and exhaust gaskets, static gaskets and seals, rigid heat shields, engine bearings, industrial bearings, bushings and washers, sintered engine and transmission components, and metallic filters.

Vehicle Safety and Protection: Federal-Mogul supplies friction, systems protection, chassis, wipers, fuel and lighting products. Federal-Mogul is one of the suppliers of friction materials. These products are used in the automotive, motorcycle, heavy-duty, commercial/industrial, aerospace, railway and consumer products markets. The primary products of this product group include brake disc pads, brake linings, brake blocks, element resistant systems protection sleeving products, flexible heat shields, brake

system components, chassis products, windshield wipers, fuel pumps and lighting products.

Global Aftermarket: Global Aftermarket sells products manufactured with in the product groups and purchased from outside suppliers to the independent automotive, heavy-duty and commercial/industrial replacement markets.

Customers: Federal-Mogul supplies OEMs with a variety of parts, essentially all of which are manufactured by Federal-Mogul. Federal-Mogul's OE customers consist of automotive and heavy-duty vehicle manufacturers as well as agricultural, off-highway, marine, railroad, aerospace, and industrial application manufacturers.

Federal-Mogul's aftermarket cu

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
