The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ICAP plc business.

About ICAP plc

ICAP plc is a voice and electronic interdealer broker and provider of post-trade services. The company operates in the wholesale markets in interest rates, credit, commodities, FX, emerging markets, equities and equity derivatives.

The company operates a network covering approximately 50 countries. Its businesses are distributed across approximately 50 locations in 32 countries worldwide. The company manages business across three main regions Europe, Middle East and Africa (EMEA), The Americas, and Asia Pacific.

Divisions

The company's business is organized across three divisions: Voice broking, Electronic broking, and Information.

Voice broking: Voice brokers play a role in various markets in which ICAP is active. In markets where there is less liquidity, voice brokers work with their customers to match buyers and sellers and facilitate price discovery.

Electronic broking: ICAP's network, of which the platforms are EBS for spot FX and BrokerTec for fixed income products, offers connectivity to approximately 7,400

workstations and 1,500 algorithmic trading systems worldwide. ICAP is a provider of post-trade services through subsidiaries, Traiana and Reset, and its associate TriOptima.

Information: The company is the source of global market information and research for professionals in the international financial markets. The company's market data offering includes real-time, end of day and historical market data from its electronic broking and post-trade platforms.

Markets

The company is active in a range of markets, including interest rates, credit, commodities, FX, equities, emerging markets, information and post-trade services.

Significant Events

On September 9, 2009, Goldman Sachs Group Inc. has announced that it would participate in a joint venture between foreign exchange settlement provider, CLS Group, and interdealer broker ICAP plc Goldman Sachs would join a founder group of seven banks consisting of Bank of America (BAC.N), Credit Suisse (CS.N), Citigroup (C.N), Deutsche Bank (DBKGn.DE) (DB.N), J.P. Morgan (JPM.N), Morgan Stanley (MS.N) and Royal Bank of Scotland (RBS.L).

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
