term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes iCarbon Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of iCarbon Corp. business.

About iCarbon Corp.

iCarbon Corporation engages in the mining, manufacturing and selling of natural and synthetic graphite, carbon based materials and bulk industrial minerals and materials for use in different industries and applications. It owns/develops graphite mines in Canada, Madagascar and China. The company's wholly owned subsidiary is Graphite Technology Group, Inc.

The company mines, engineers, manufactures/processes and sells natural and synthetic graphite products and carbon additives for use in refractory and foundry operations and for use by manufacturers of steel, aluminum, brass and other nonferrous metals, as well as manufacturers of pencil leads, packing materials, composite materials, brake linings, lubricants, coatings, gaskets and seals, and cosmetics.

Processing Operations

The company engineers and processes a range of standardized particle sizes and blends of graphite and carbon additives at its manufacturing and processing facility located in Brocton, New York. It processes micronized graphite powders from its specialized processing facility in Delano, Pennsylvania.

The company's processing operations combine proprietary technologies, including carbon purification technology and manufacturing methodologies such as, air driven high speed particle collision technologies, screening, blending, classifying and materials optimization routing technology, for production of graphite powders for use by foundry and refractory businesses, manufacturers of steel and non-ferrous metals as well as manufacturers and producers of conductive coatings, lubricants, brake linings, industrial gasket materials, pencils and packing materials, fillers and extenders.

Company Mining

The company owns graphite mines in Canada and Madagascar and controls graphite mine operations in Hunan Province, and the option to control graphite mine operations in Jiangxi Province, China. It has entered into conditional agreements to joint venture the development of anthracite coal properties in northeastern Pennsylvania. The mineral resources of Graphite Technology are substantial, and represent viable sources of long term raw material supply.

Graphite Mining (Madagascar)

The company owns a 50% common equity interest of Societe Malagasy du Grafit (SOMAGRA), a Madagascar company that owns all mine rights, leases and development interests in the Ambatomitamba Graphite Mine located in Madagascar.

Graphite Mining (China)

The company owns 37.125% of Chenzhou Global Graphite Inc. (Chenzhou), a company based in Hunan Province, China, which is in the application process to become licensed to operate amorphous graphite mine claims located in Lutang, Hunan Province.

Graphite Mining (Canada)

The company owns an undivided interest in 4 active mineral claims and 12 leased mining claims located in Butt Township, Ontario, Canada, and by separate agreement intends to acquire all of the mineral claims and mineral leases comprising the former producing Kearney Graphite Mine.

In April 2006, GTG Cardons LLC, a wholly owned subsidiary of the company entered into agreement with Mechanical Services Inc. to acquire the former LTV Steel plant in

Aliquippa, Pennsylvania on the Ohio River.

Significant Events

iCarbon Corp. has launched a new bulk industrial minerals and materials division, which would provide contract processing for industrial clients, utilizing the company's proprietary manufacturing and chemical-based processing technologies.

Competition

The company's competitors in China include Timcal Ltd., Nacional de Grafite Ltda., Industrial Minerals, Inc., Crystal Graphite Corporation, Worldwide Graphite Producers Ltd., and Sequoia Minerals Inc.

History

iCarbon Corporation was founded in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
