The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of iDNA, Inc. business.

About iDNA, Inc.

iDNA, Inc., through its subsidiaries, operates as a strategic communications, technology, and entertainment company in the United States.

Segments

The company operates in three segments: Strategic Communications Services Segment, Information Services Segment, and Entertainment Segment.

Strategic Communication Services Segment

The Strategic Communications Services Segment provides content development via the design, development and production of media, collateral material, logistics, support and/or broadcast services for presentations at corporate and institutional events, meetings, training seminars and symposiums. The presentations may be live at single or multi-site venues and can include video conferencing, satellite broadcasting and Web casting or the presentations may be provided via on-demand access via Internet Web sites, DVD or video tape.

The company's wholly-owned subsidiaries in this segment include Campus Group Companies, Inc. (CGC); iDNA Healthcare Communications, Inc. (iDNA Healthcare); and

OMI Business Communications, Inc. (OMI).

Information Services Segment

The Information Services Segment utilizes custom wireless communication technology and proprietary software to facilitate client audience interaction, participation and polling to collect, exchange and/or analyze data and information in real-time during a meeting or event. Clients can obtain and respond dynamically in real-time to audience preferences, attitudes or responses to specific queries within an event. The wireless communication services are available as a turn-key service provided by the company during a scheduled meeting or event or alternatively, a client can purchase from the company the required electronic components and related proprietary software to administer its needs independently. The company's wholly-owned subsidiaries in this segment include Audience Response Systems, Inc. (ARS) and Option Technologies Interactive, LLC (OTI).

Entertainment Segment

The company, through its investment in the Angelika Film Centers, LLC (AFC), operates in the movie exhibition and entertainment industry. AFC is owned 50% by the company and 50% by Reading International, Inc. AFC owns and operates the Angelika Film Center. The Angelika Film Center is a 17,000 square foot, six screen multiplex theater and cafe that focuses on the exhibition of art and specialty films.

Clients

The company's clients include national and multi-national pharmaceutical, financial services and consumer product companies, such as Actellion, Ltd.; American Express Company; Booz Allen Hamilton, Inc. (Booz Allen); Caterpillar, Inc.; Deloitte LLP; KPMG International LLP; Pfizer, Inc. (Pfizer); PricewaterhouseCoopers LLP; OptionFinder Europe GmbH; and R&D Strategic Solutions, Inc., as well as other companies seeking to develop communication, education and/or training content for periodic events.

History

The company was founded in 1969. It was formerly known as National Auto Credit, Inc. and changed its name to iDNA, Inc. in 2006.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
