Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of IFCO Systems NV business.

About IFCO Systems NV

IFCO SYSTEMS N.V. is an international logistics service provider. The company operates with approximately 210 locations worldwide.

IFCO SYSTEMS operates a pool of approximately 96 million RPCs (Reusable Plastic Containers), which are used primarily to transport fresh produce from producers to grocery retailers. In the United States, IFCO SYSTEMS also provides a national network of Pallet-Management-Services.

Segments

The company is engaged in two main business segments: RPC Management Services business and a Pallet Management Services business in North America.

RPC Management Services business segment

The company, in its RPC Management Services business segment, offers reusable packaging, transport and service solutions across all industries, providing customers with modified solutions for all their packaging needs. It provides reusable packaging solutions for fresh products such as meat and also solutions for beverages, bulk

containers and plastic pallets. The service portfolio of IFCO SYSTEMS covers all aspects of pool management and supports the full supply chain. It advises customers on the selection of the optimal reusable packaging product.

IFCO SYSTEMS' core competence is the management of a worldwide rental pool of approximately 96 million RPCs used to transport fruit and vegetables. Offering a total of 21 different models, its RPCs address the packaging and transportation requirements of various types of fruit and vegetables.

IFCO SYSTEMS has developed a logistics network in place that include 59 service centers worldwide at strategic locations in main markets. IFCO SYSTEMS coordinates the outbound and inbound movement of approximately 450 third party truckloads of RPCs. IFCO SYSTEMS transported goods with a total weight of approximately 3 million tons in its RPC Management Services business segment during 2008.

Pallet Management Services

The company operates as a pallet management services company, specializing in environmental sustainable pallet programs throughout the supply chain in North America.

IFCO SYSTEMS programs include the procurement, reconditioning and distribution of wood pallets to and from the manufacturing, distribution and retail sectors. Pallets are used in virtually all industries to transport products. IFCO SYSTEMS focuses on pallet recycling and the surrounding supply chain logistics services including pallet retrieval, procurement, handling, repair, transportation and tracking solutions to provide a 360-degree pallet management services.

IFCO SYSTEMS is supported by 155 total locations. These locations include 56 which are primary pallet recycling centers and 99 other operating and satellite locations - many of which are located at or near customers' retail distribution centers. IFCO SYSTEMS also has 124 affiliate companies.

The company serves retailers such as Wal-Mart, Kmart, Home Depot and Target; food producers such as Nestle, PepsiCo, Purina Mills, Del Monte, Tyson Foods and Pilgrims Pride; manufacturers such as General Electric, Black & Decker, Georgia Pacific and Newel Rubbermaid; and technology company Dell. The company handled approximately 125 million wooden pallets in the U.S in 2008.

History

IFCO SYSTEMS N.V. was incorporated in 1999.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
