The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Iliad SA business.

About Iliad SA

Iliad SA operates as an alternative dial-up and broadband Internet Service Provider (ISP) in France. It also operates in the French fixed telephony market. The company engages in the study, implementation, maintenance, operation, management or marketing all systems, equipment, networks or services in the fields of telecommunications, Internet, data processing, telematics, and communications, including installation and operation of electronic communications networks.

It also engages in the publishing and dissemination of all services, programs and information, in particular, to publish and provide telephone and telematics services to the public and disseminate audiovisual communications services by any technical means, in particular, through the press, radio, audio-visual media, video or remote transmission, on magnetic or other media.

The company operates in three business segments: Internet segment, telephony segment, and other services segment.

Internet segment

The Internet segment business focuses on: the provision of Internet access by the company Free, based on both dial-up access, which includes two services, one a pay-

as-you-go service and the other a fixed-rate package offering 50 hours of access per month, and broadband Internet access via ADSL; and the provision of shared Web site hosting and the registration of domain names by the company Online.

Telephony segment

The company's telephony segment focuses on the activities of the fixed telephony operator One.Tel and those of the prepaid phone card provider Kertel, as well as on the call termination business developed by Kedra. With approximately 335,000 customers as of December 31, 2004, One.Tel is a relatively small fixed telecommunications operator. Kertel, which is the second major provider of prepaid phone cards in France, offers call termination services in particular to the Group's fixed telephony business.

Other Services Segment

Other Services include directory services, mainly the ANNU reverse look-up directory accessible by Minitel, telephone, Internet and SMS text messaging; and e-commerce operations Socie'te'.com and Assunet.com. Assunet S.A. operates as a web-based insurance broker; and Socie'te' S.A. operates a Web site providing information about companies.

Customers

The company's primary online customers include small office/home office (SOHO) customers, and small and medium-sized businesses.

Competition

The company's main competitors include: international Internet service providers, such as Wanadoo, AOL, TOnline.net (Club-Internet), Tiscali, Telecom Italia and neuf telecom. The company's competitors include: France Te'le'com, Intercall, and GTS Omnicom.

History

Iliad SA was incorporated in 1987.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
