About iLive Inc.

iLive Inc (the company) is a developer of online entertainment focused on the delivery and distribution of streaming video content on an on-demand and pay-per-view basis. The company develops its own content and assist others develop a distribution channel for their content on the iLive Network. The Company offers video-on-demand, electronic shopping, physical VHS and DVD distribution and business-to-business content creation and distribution.

The Company is currently developing a business-to-consumer model that focuses on the distribution of content online. Through its website, iLive.com, the company is designed to capitalize on the growing video on demand market on the Internet.

The Company's Solution

The Company offers video on demand, electronic shopping, physical distribution of VHS and DVD, and business-to-business content creation and distribution services. The marriage between the personal computers and cable worlds, as well as the personal computer and television, will allow it to create a full service interactive programming network.

Online Streaming

The Company's online streaming division continues to focus on building a quality library of unique content as well as developing a proprietary peer-to-peer distribution platform for sharing content. The company currently has developed approximately 250 hours of content and continually looks to partner with content providers (like Pro Sound Stage and Lighting) as well as purchase content to keep the users experience rewarding. In building its library of content, the company will always strives to possess new and entertaining episodes by both producing its own shows and syndicating content from other producers.

The Company has opted away from early pioneers of covering red carpet events, and showing movie trailers, and have instead looked to produce timeless shows like cooking lessons, and focus on topics like relationships, and celebrity homes.

Business Services

With iLive producing more than 250 hours of content for the Internet, the company has a certain expertise in filming, online editing and encoding. The company also offers the unique ability to take existing content and push it through its distribution channels.

Competition

iLive's main competitors are companies like Cinema Now, Intertainer, iFilm, and of course AOL/Time Warner.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
