- The Iluka Resources Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Iluka Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Iluka Resources Ltd. business.

### About Iluka Resources Ltd.

Iluka Resources Limited engages in mineral sands mining and processing operations in Australia and the United States. Iluka is engaged in the production and sales of titanium minerals and zircon. Most of Iluka's titanium mineral products are used to produce titanium dioxide pigment, a pure white, highly refractive and ultra-violet absorbing material used in protective coatings such as house and car paints and sunscreens, as well as plastics, paper and textiles. The properties of zircon make it suitable for varied applications in refractory, foundry and other industrial applications. However, the largest user of zircon is the ceramics

industry, where the opacity and hardness of zircon gives whiteness and durability to tiles, sanitary-ware and table-ware. Iluka's mining and processing activities demand high standards of environmental management. The mining operations are based on a sequential process of excavation and rehabilitation. A number of Iluka's former mine sites are now productive farms, wildlife sanctuaries, recreation areas and residential districts. All production and processing operations are managed and monitored to minimise impacts on the environment and surrounding communities, as well as extensive deposits of titanium minerals and zircon in Australia and the USA. The acquisition also included a controlling interest in Consolidated Rutile Limited in Queensland, a 75 per cent interest in Koba Tin in Indonesia and a 50 per cent share of Narama Coal in New South Wales.

The activities of the consolidated entity consist of the exploration, mining, concentration and separation of mineral sands, production of ilmenite, rutile, synthetic rutile and other titaniferous concentrates, zircon and coal and sales of these products throughout the world.

#### Business Interest Assets

WA Titanium Minerals 100% Six open pit mine sites, two dry separation plants, two synthetic rutile plants and a zircon finishing plant. Iluka Resources Inc USA 100% Dredge mine and open pit mine – Florida. Open pit mine – Virginia. Two dry separation plants and a zircon finishing plant.

#### Business Interest Assets

WA Titanium Minerals: Six open pit mine sites, two dry separation plants, two synthetic rutile plants and a zircon finishing plant.

Iluka Resources Inc USA: Dredge mine and open pit mine – Florida; Open pit mine – Virginia; and Two dry separation plants and a zircon finishing plant.

Consolidated Rutile Limited: Two dredge mines - North Stradbroke Island and Dry separation plant -Pinkenba, Brisbane.

Narama Coal: Hunter Valley open cut coal mine operated by joint venture partner Xstrata.
